Introduction

Congratulations! You are now a member of the Nomadic Team. This guide will show you how to run and facilitate both the “Arizona Sunshine: Refinery Rescue” experience, and the Nomadic retail space. You'll learn and be responsible for powering up the gear, guiding groups through the experience, interacting with customers, and shutting the system down at the end of the day.

Nomadic engages your senses and pulls you into fully immersive VR experiences that allow you to move freely while interacting within a virtual world. Touch walls, flip switches, even ride a helicopter. Be transported and transformed through the view within your headset. Walk into a place you’ve never been, do things you never thought possible.

The customer sees the room as a virtual environment through the headset, and overhead cameras recognize LEDs in the physical props they use during the experience. These props then seamlessly exist in the virtual space.

Other parts of the experience, like sensors in the swinging doors, are wired directly to the computer at the back of house and allow the VR environment to “see” the doors and make them move in sync with the real doors. The result is an interactive experience that profoundly triggers the senses.

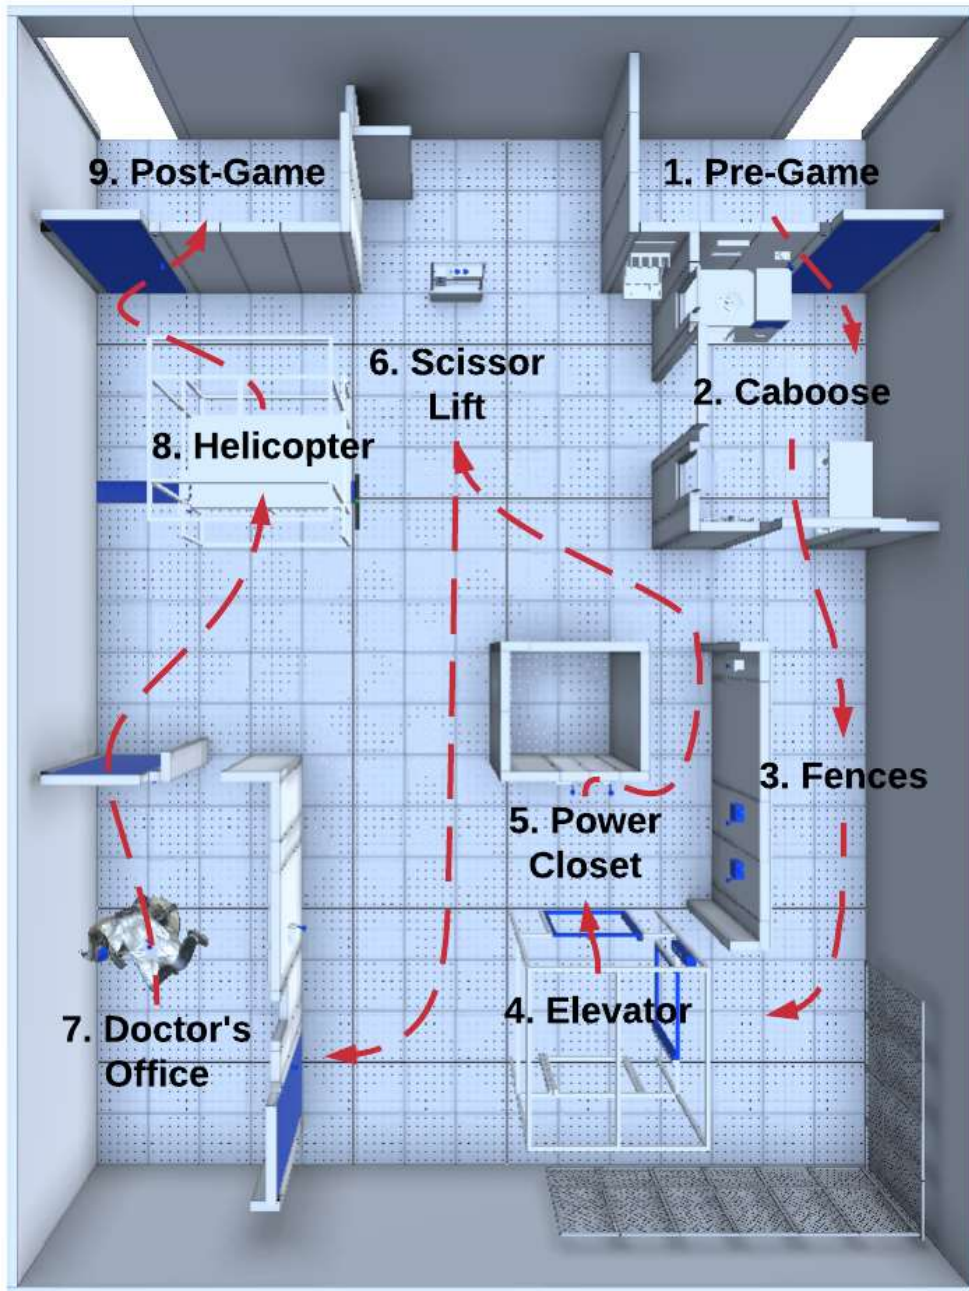

Overview of the Playspace

Backpack and Headset

Nomadic's backpack computers run Arizona Sunshine in a similar way to a video game, which is displayed in the Oculus VR headsets. It will be your responsibility to keep the backpack full of charged batteries, and the headset clean and functional. Unlike a home-based VR setup, the elements of our playspace are what make the experience truly unique. Let's have a look.

The Customer Journey Within the Experience

Within the playspace, customers embark on a vast journey to rescue the cure from Dr. Adams while fighting off hordes of zombies. They'll verify that their equipment works and be given a short introduction to the experience in the pre-game (1), hop on a train

caboose where they'll find their weapons (2), then navigate a treacherous precipice (3) on their way to the elevator (4).

They'll take an elevator ride, exit, and switch a series of levers to turn the power back on in the refinery (5). Then they'll ride a scissor lift (6) in order to get to the doctor, who possesses the cure to the zombie outbreak.

In the doctor's office (7), they'll have to lift his helmet visor to have his eyes screened, which will capture the cure. Then they'll head to the helicopter to be brought to safety (8).

Once the helicopter lands, they'll deposit the cure in the post-game (9), place their weapons in the rack, and lift their headsets, completing the experience.

Your duty is to monitor each group in the experience, but interfere as little as possible. The experience itself guides the group through, so only unexpected behavior will ever cause you to intervene.

Setting Up the Nomadic Experience

Now that you have a clearer picture of how the Nomadic experience works, let's put it into practice. At the start of every day, you and a coworker will follow these procedures to make sure the experience is ready for customers.

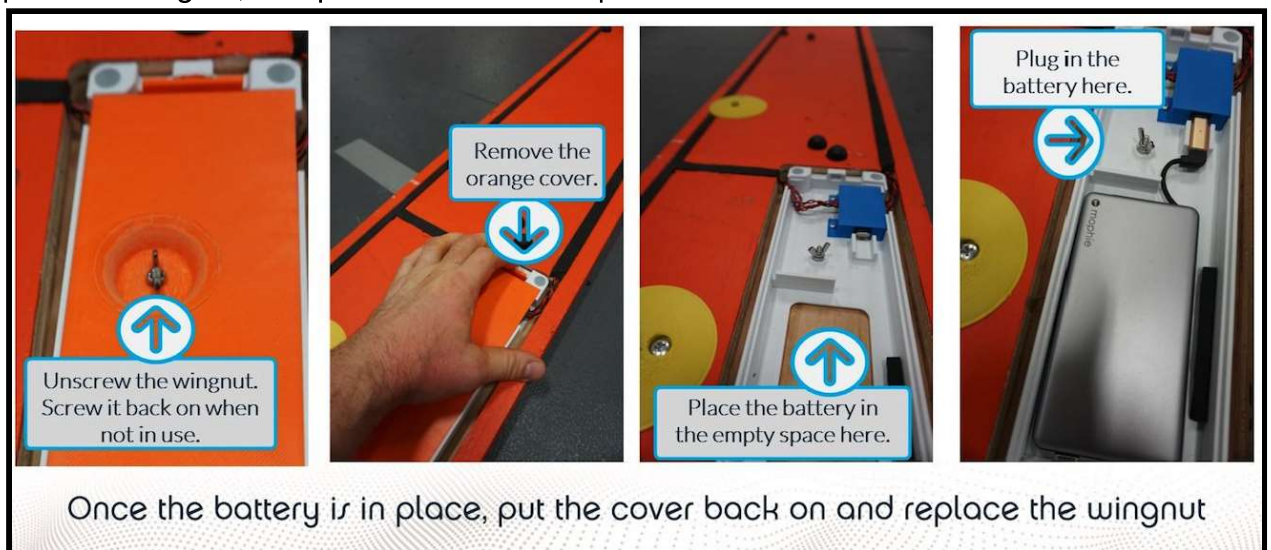

Ensuring that the experience works is your first priority for the day. You'll prepare the rest of the retail space following these steps.

Prepping the Playspace

You and a coworker will walk through the experience together in order to test it. You're going to get a lot of practice shooting zombies! Follow these instructions to prep the playspace for this test.

Playspace Interior Setup

1. Take a plank battery, flip the plank over, and follow these instructions. Flip the plank over again, and place it within the taped area on the floor.

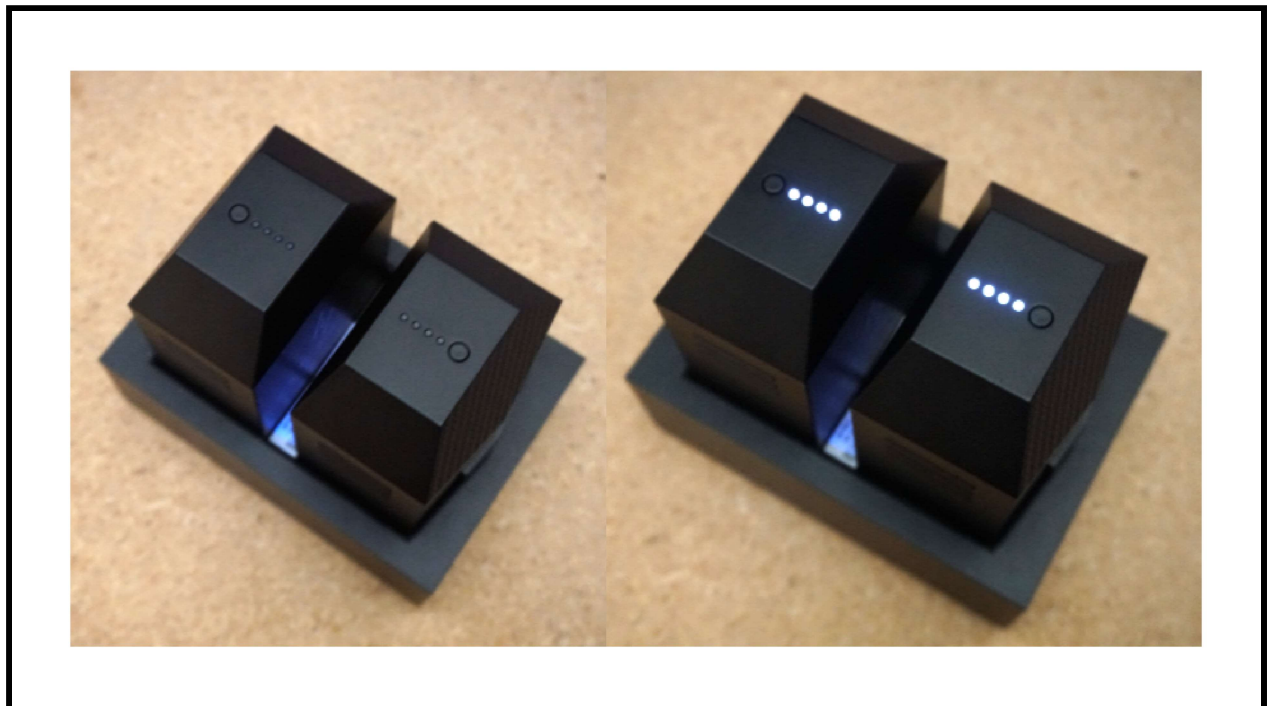

2. Make sure the Doctor is seated, facing the wall with the monitors, the button box on his lap is facing up, and has his visor flipped down.

Maintaining Battery Charge

It is crucial to make sure the backpacks and Strikers have enough battery life to successfully put customers through the experience. If they lose battery power, the experience ends.

Backpack Batteries

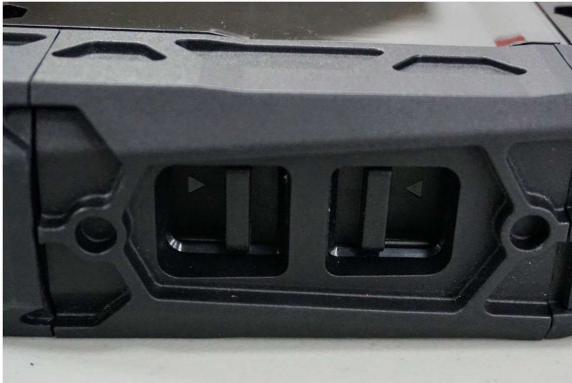

The backpacks are powered by two batteries each. At the start of the day, backpacks should all be turned on, plugged in, and hanging from their hooks. Before starting the experience, verify that all batteries have at least three LED indicators lit. Change batteries after every playthrough, regardless of the remaining charge. You can check the charge level by pushing the round button next to the battery's LED indicator lights.

A backpack battery is fully charged if it shows no LEDs lit when sitting in the charger. Press the button next to the LEDs to show the amount of charge. Four LEDs indicate a full charge.

Strikers and their Batteries

Strikers are the weapons used in the experience by the customers. They have sensors on them so they can be detected in the game. Each one at Nomadic has a number that corresponds to the number on its matching backpack.

Start the day by putting batteries into eight Strikers. If there is higher demand later in the day, you can bring more Strikers online.

There is no battery indicator on the Striker itself, but they will hold a charge for several hours. As a daily procedure, swap all Striker batteries in the middle of the day. Make sure you turn Strikers off before removing their batteries.

Change Striker batteries by pinching the two tabs with your thumb and forefinger, then pulling. Make sure the Striker is switched off before you change Striker batteries.

When charging Striker batteries, the LEDs in the charger will light either red or green. This is what their signals mean:

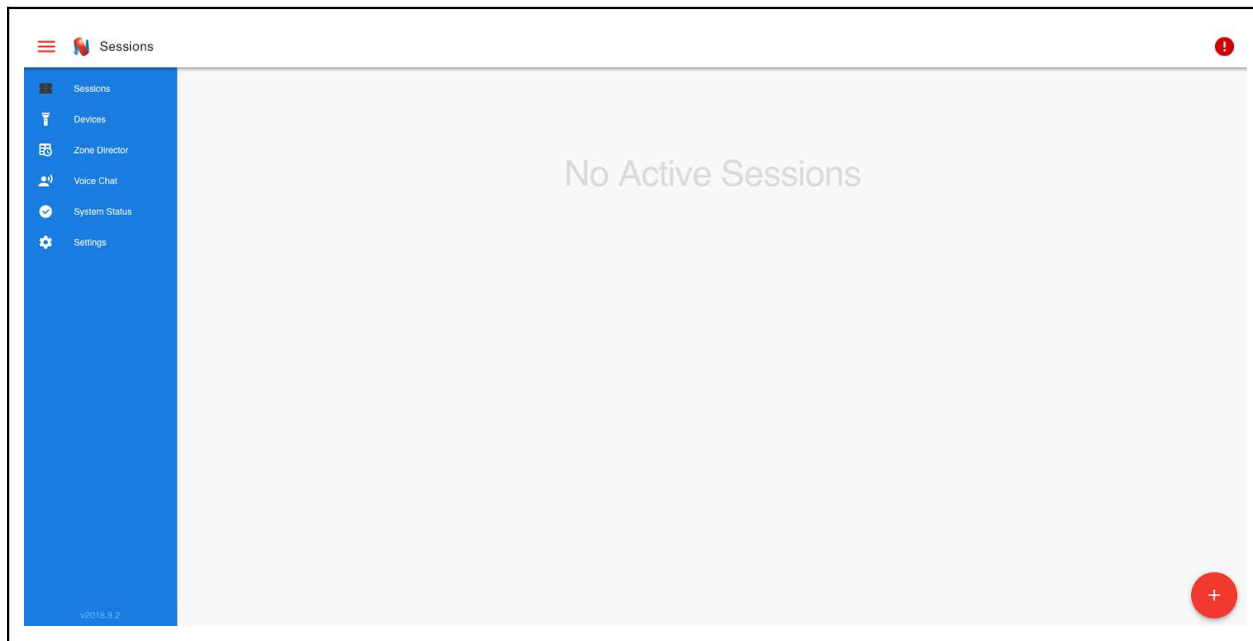

1. **Solid Red** = Battery without charge. Leave it in.
2. **Blinking Green** = Currently charging. Leave it in.
3. **Solid Green** = Completely charged. Use it if you need it.
4. **Flashing Red** = This indicates a charging issue. Unplug the charger, wait 30 seconds, then plug it back in. If this does not resolve the issue, tell your Manager or Field Service Technician.

Launch your First Experience

A program called OpRemote is used to start the experience. It can be accessed through the web browser on the iPad. OpRemote will be your best friend as you guide customers through the experience. Wear it with the strap slung over your shoulder throughout the day.

The following tutorial is meant as a basic test to be sure the experience can be successfully loaded on all backpacks. A full playthrough should be done afterwards.

Basic Test for All Backpacks

Make sure there are no active sessions already running in OpRemote. If there are, end them.

The screenshot shows the 'Backpacks' tab in the OpRemote interface. The left sidebar is the same as in the previous image. The main area displays a table of backpacks. The table has columns for Status, Name, Id, State, Checkpoint, Session, Language, Volume, Battery, and Actions. All backpacks are in the 'Idle' state.

Status	Name	Id	State	Checkpoint	Session	Language	Volume	Battery	Actions
Idle	C-101	31744	Idle	-	-	English	100%	100%	⋮
Idle	C-102	31745	Idle	-	-	English	100%	100%	⋮
Idle	C-104	31747	Idle	-	-	English	100%	100%	⋮
Idle	C-105	31748	Idle	-	-	English	100%	100%	⋮
Idle	C-106	31749	Idle	-	-	English	100%	100%	⋮
Idle	C-107	31750	Idle	-	-	English	100%	100%	⋮
Idle	C-109	31752	Idle	-	-	English	100%	100%	⋮
Idle	C-110	31753	Idle	-	-	English	100%	100%	⋮
Idle	C-111	31754	Idle	-	-	English	100%	100%	⋮
Idle	C-112	31755	Idle	-	-	English	100%	100%	⋮
Idle	C-116	31759	Idle	-	-	English	100%	100%	⋮

Go to the “Devices” tab and make sure all backpack icons are yellow and marked “Idle.”

New Session

Arizona 2018.9.26.0

Backpacks

C-101

C-102

C-104

C-105

Tap the  icon to start a new session. Select **all** available backpacks.

Tap  to launch the session.

Check the views in the headsets one at a time while they're hanging from the hooks. Verify that the view is of a white room just like the one shown above. If you do not see this, try tilting the headset up. If it still doesn't work, verify that the backpack is turned on. Beyond this, remove all headsets and backpacks that don't pass this test, and give them to the Field Service Technician.

Testing the Entire Experience

Tap  once you've completed your test, then start a new session with only two backpacks: one for you, and one for a coworker.

Switch on and place two strikers in the experience.

Turn on the Striker by holding down this button at the bottom of the stock.

To turn the Striker off, tap this button three times, holding it down on the third time. Shutdown is verified when the light turns purple.

Unplug the backpacks, put them on, and begin the experience. Once a Striker is turned on you will see a blinking blue light, followed by green, then a solid blue light. Watch closely for the green light followed by blue, as the green light indicates that it has paired with the backpack.

If the Striker has not gone through this pattern, restart it (see “Troubleshooting Within the Experience”). Attempt to restart only twice before swapping both backpack and Striker.

If the Striker is unresponsive, replace the battery.

Launch the experience in the same way you did for your initial test. This time, tap “Start Game” in OpRemote once you’re in the pre-game area. Alternatively, customers can start the experience themselves by giving a thumbs up. This works when Leap Motion is functional.

A Thorough Check of the Playspace

There are many elements of the experience that must be functioning properly in order to deliver the best service to our customers. As you walk through the experience, use this checklist to make sure it's running optimally.

Pre-Experience Checklist

Condition	Pass	Fail
Backpack battery levels		
No active sessions in OpRemote		
OpRemote recognizes all necessary backpacks		
OpRemote starts and ends sessions successfully		
All backpacks are "Idle" in OpRemote		
Battery placed in plank		
Launching all backpacks to pre-game state with no issues		

In-Experience Checklist

Condition	Pass	Fail
Strikers are visible and shoot in VR		
Hands tracking in game with Leap Motion		
Leap Motion thumbs-up initiates the pre-game sequence		
Caboose entrance door tracks		
Caboose lever switches on light		
Caboose file cabinet top drawer tracks		

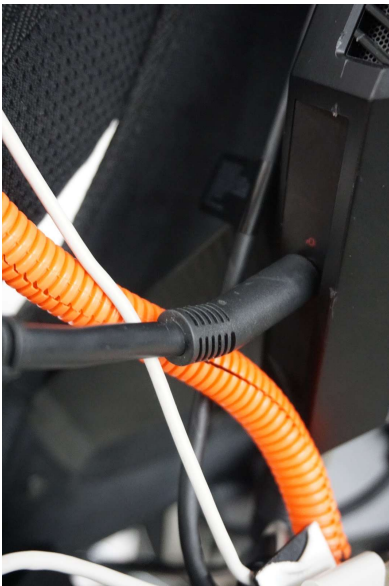

Environmental effects - Caboose fan triggers		
Environmental effects - Caboose audio triggers		
Environmental effects - Caboose vibrations trigger		
Planks shows up in game and tracks		
Environment effects - Plank fans		
Up button before the elevator brings up the elevator		
Elevator entrance door tracks		
Inside elevator: top button on button box starts the elevator		
Environmental effects - elevator fans		
Elevator exit door tracks		
Lever closet switch one tracks		
Lever closet switch one turns green when switched		
Lever closet switch two tracks		
Lever closet switch two turns green when switched		
Lever closet switch three tracks		
Lever closet switch three turns green when switched		
Lever closet switch four tracks		
Lever closet switch four turns green when switched		
Scissor lift "Start" button initiates the lift		
Scissor lift horn button initiates the horn		
Scissor lift up arrow button initiates the lift up		
Environmental effects - Scissor lift fans trigger		
Environmental effects - Scissor lift audio triggers		
Environmental effects - Scissor lift vibrations trigger		
Office platform lever tracks		

Office platform lever responds when switched		
Office entrance door tracks		
Doctor in office tracks		
Doctor visor tracks		
Office exit door tracks		
Helicopter arrives		
Environmental effects - Helicopter cage movement		
Environmental effects - Helicopter fans trigger		
Environmental effects - Helicopter audio triggers		
Environmental effects - Helicopter vibrations trigger		
Helicopter buttons for minigun function		
Helicopter joystick controls minigun aiming and general movement		
Post game entrance door tracks		
Leaderboard is visible		
Playspace is physically aligned with elements in VR		

If even one of the items in this list fails, let the Field Service Technician or Manager know immediately so it can be escalated and solved.

Post-Test

Once you've successfully tested the experience, follow these instructions to reset the equipment for your first customers. Repeat this process any time a group of customers walks through the experience.

		
Hang the backpack on the hook and clip the headset to the carabiner on the shoulder strap.	Plug the power cord into the backpack.	Clean the headset (see Standard Operating Procedure).

At this point you will also change batteries on all backpacks. Make sure to do this every time a backpack is put through the experience.

Retail Space Setup

The retail portion of Nomadic is just as important as the VR experience itself. It gives customers their first impressions, and helps to immerse them before they even put on a headset. Follow this list before opening every day, in addition to checking the Google Form for opening procedures.

1. We offer a variety of merchandise for purchase at our location. Make sure this area is tidy and fully stocked. This includes receipt paper and shopping bags.
2. At the customer kiosks, make sure monitors are on, keyboards work, and wristband printers are stocked and functioning.
3. Wipe down the glass on the front door, and spot clean anywhere else if needed.
4. Check that lockers are empty and functioning properly.
5. Print the list of reservations for the day. This can be found using Xola.

Duties in the Lobby

At Nomadic, you may find yourself in one of several roles in the lobby. Here is a summary of your responsibilities.

Front Desk Concierge

1. Greeting and welcoming the guests as they enter.

2. Inquiring about reservations and offering to assist in purchasing tickets.
3. Assisting with printing and attaching wristbands.
4. Managing and combining group sizes, overseeing the reservation schedule, and radioing guides when groups are ready to enter the gear room.
5. Fielding any other customer inquiries or complaints, whether in-person or over the phone.
 - a. When answering the phone, say “Thanks for calling Nomadic. My name is <blank>. How may I assist you?”
6. Taking payment and answering any questions about retail merchandise we have on offer.

Greeting and Assisting Your First Customers

Welcome

If you're stationed at the front desk as the concierge, your responsibilities will include greeting customers.

When a customer or customers enters our retail space, smile and say “Welcome to Nomadic.” If they haven't approached a kiosk, ask if they have already bought tickets. If they have, direct them to the nearest kiosk and tell them you're available to help if necessary.

Ticketing

If they haven't bought tickets yet, let them know they can use the kiosk to book the next available slot.

If you're a Manager, you also may need to issue a free play or refund to customers. At all times you will be the customer service voice for any questions or complaints.

Safety

When customers walk in, do a visual safety assessment. High heels, crutches, and those visibly intoxicated are not allowed into the playspace. If a customer approaches you asking if the experience is safe for a pregnant woman, tell them there are parts of the experience where balance is important, and it is up to them to decide whether they're confident in proceeding.

The Nomadic Experience for the Disabled

If a customer tells you they are disabled and require a wheelchair, inform them that we are a wheelchair friendly experience. We have a wheelchair available that they can use for a similar experience to other customers. Use this language specifically:

While we do consider ourselves 'wheelchair friendly,' we advise you to please use caution — wheelchair-accessible areas and actions during the game may not always reflect virtual-world conditions or situations. While some areas and situations may be more restrictive than others in the virtual-world, we as the staff are here to guide you through the experience in a safe and wheelchair friendly manner.

Note that due to space constraints, the maximum number of customers allowed in a group with a wheelchair is two. A customer in a wheelchair can walk through the experience with a guest. An additional guest can push them, or they can push themselves if able to.

The Nomadic Kiosk

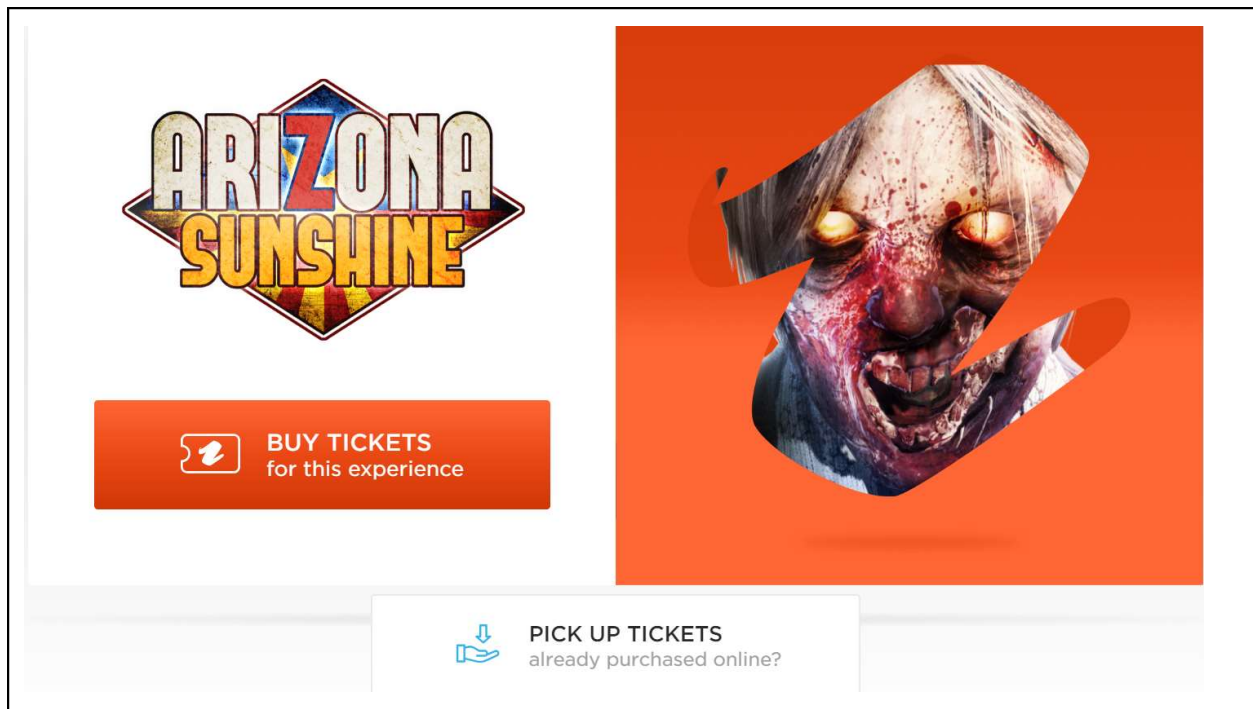

The Nomadic Kiosk is where customers can purchase tickets, confirm online purchases, and print wristbands to be scanned in the gear room before the experience begins.

If a wristband fails to print for a customer, check if the wristband printer is empty, and refill if necessary. If this doesn't resolve the issue, contact the Manager or Field Service Engineer and allow the customer to enter the gear room, notifying the guide that they don't have a wristband.

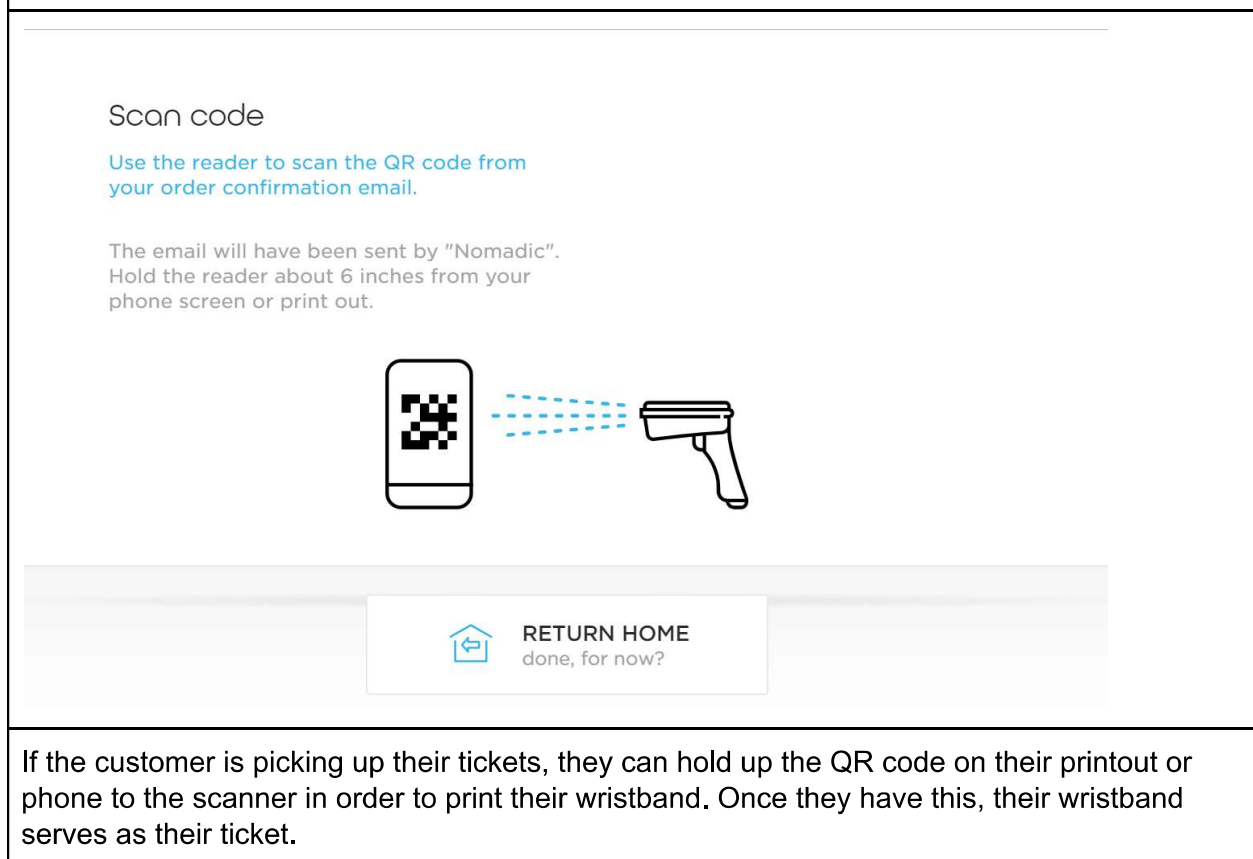

The Kiosk screen should always be locked to prevent customers from using other parts of it. To toggle between this mode, press **Ctrl+W** on the keyboard.

Overview of the POS System

The following screens detail a customer's journey as they approach the kiosk and either pick up or purchase tickets for the experience.

This is the front page of the POS the customer will see as they approach it. It is currently branded with the Arizona Sunshine experience, but can change when we add more experiences. Customers can choose to either **BUY TICKETS** or **PICK UP TICKETS**.

If the customer is picking up their tickets, they can hold up the QR code on their printout or phone to the scanner in order to print their wristband. Once they have this, their wristband serves as their ticket.

The Full Customer Experience

Guiding Customers

Once customers have their wristbands, they'll be ready to enter the gear room when called. Each group will be accompanied by one of our guides from the moment they're called at their scheduled time, to when they've exited the experience and taken off their gear. Let's take a look at what your duties will be for this process.

Group Scheduling

Our maximum group size is four, with a minimum of two. If a single customer wants to try and it's a slow time of day, an employee can become a group member to accompany them.

You will be responsible for one group from the time they're called in, to the time they're suited off. Always combine groups if possible, and make brief introductions so they know each other as a team.

There are some situations in which you'll have to make accommodations for group scheduling. As a general rule, bring customers into the experience as quickly as possible, and don't allow a group's tardiness to affect the scheduling of other groups.

Follow these tips to ensure customers go through the experience in a timely manner.

1. If a group is late, offer them the next available slot. You can use Xola to find this. If they cannot or will not wait, offer them a free play to come at another day.
2. A group of two or three can book a session, but they may be combined with another smaller group in our ticketing system. A single customer can also be added to a group, but may have to wait. If there is an available employee at a

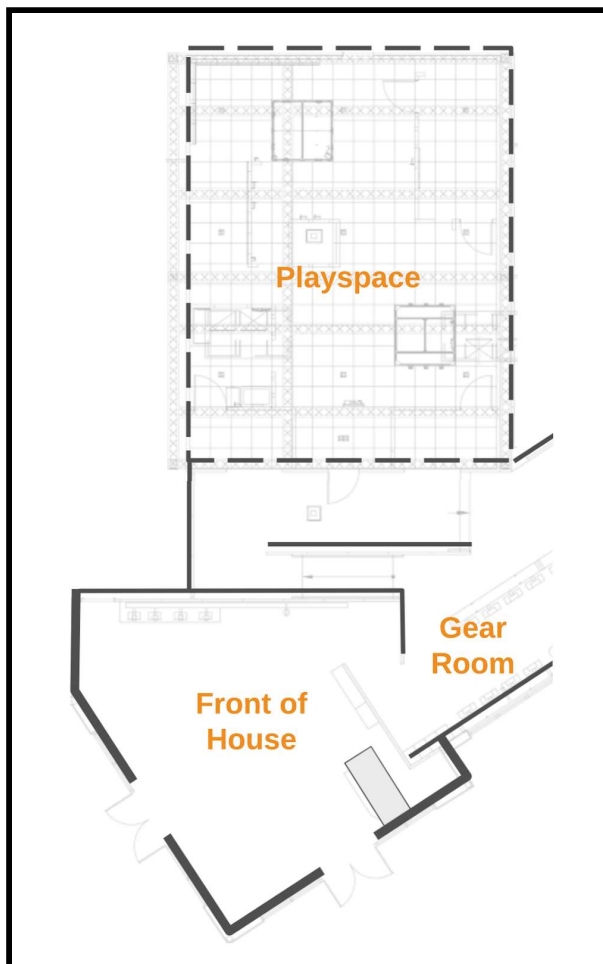

slow time of the day, the employee can accompany the customer through the experience as another customer.

3. If a group is scheduled and not all members of that group have arrived, wait until their scheduled start time and give them a choice. They can play as a partial group at their scheduled time, or wait for the remaining members and schedule for the next available time. If they'd like to play again when their other team member(s) has arrived, they will have to pay again.

How a Group Meets its Guide

1. The concierge identifies the group by the name of one of its members and radios the guide, "<blank>'s group is ready for you."
2. The guide comes to the front of house and says "<blank>'s group, your experience is about to begin."
3. If the guide is having trouble finding their group, ask the concierge for assistance.

Entering the Gear Room

Greet your group by saying "Welcome to Nomadic. My name is <blank>. Follow me and we'll get you suited up."

Before you suit up your group, tell them to deposit all belongings, including cell phones, into lockers. Then proceed into the gear room.

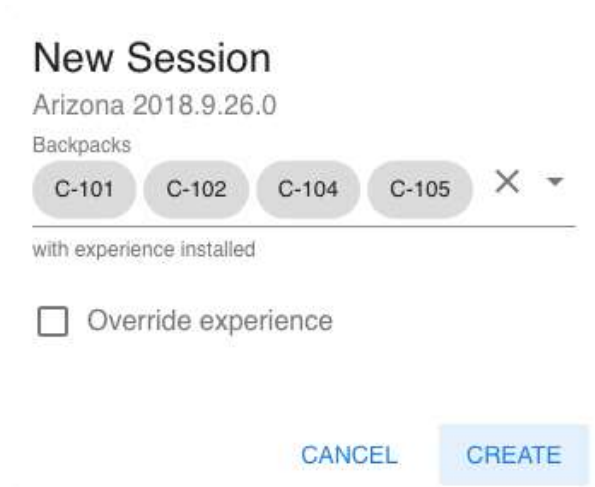

Identify the group of backpacks you wish to use for this session. Choose backpacks in number order throughout the day so they are used with the same frequency.

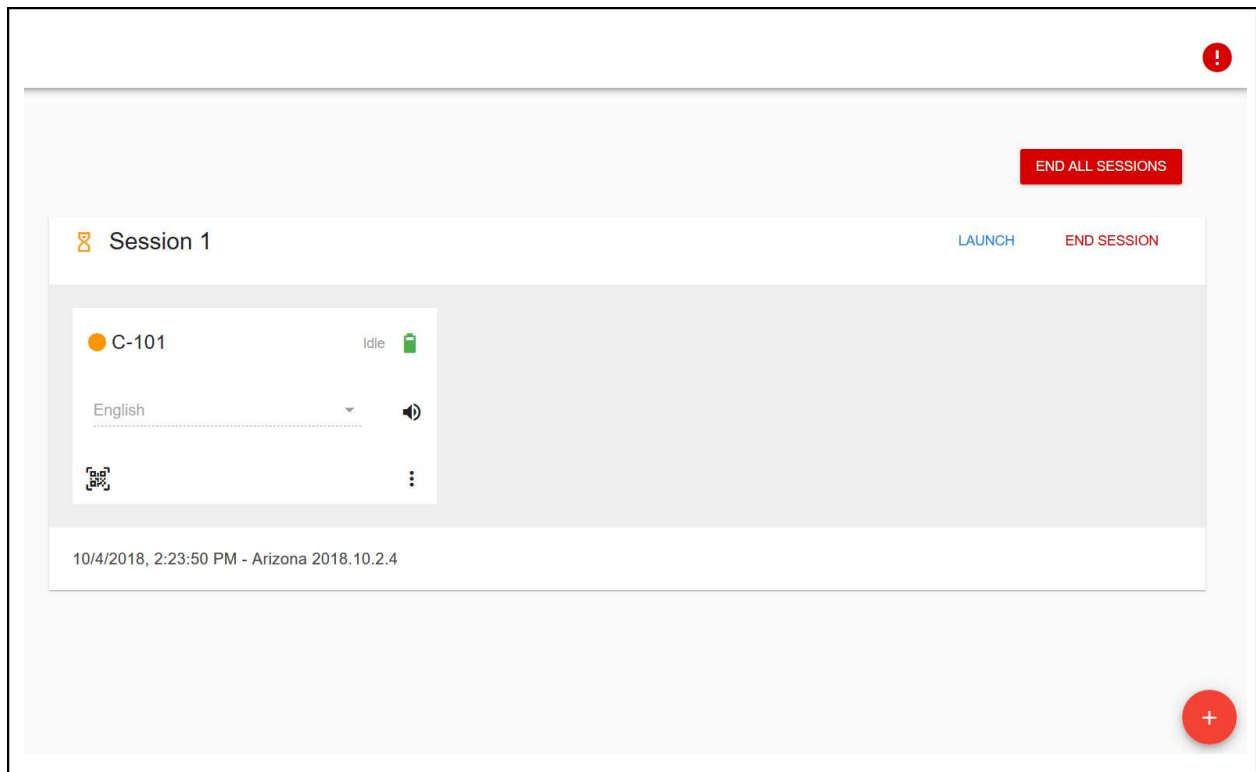

Scanning Wristbands and Launching the Experience in OpRemote

Now that you've identified the backpacks that you'll use, you'll associate the backpack numbers with the customers' wristbands. This allows you to see each customer's name matched to their backpack in OpRemote, and links them to their scores on the leaderboard after the experience.

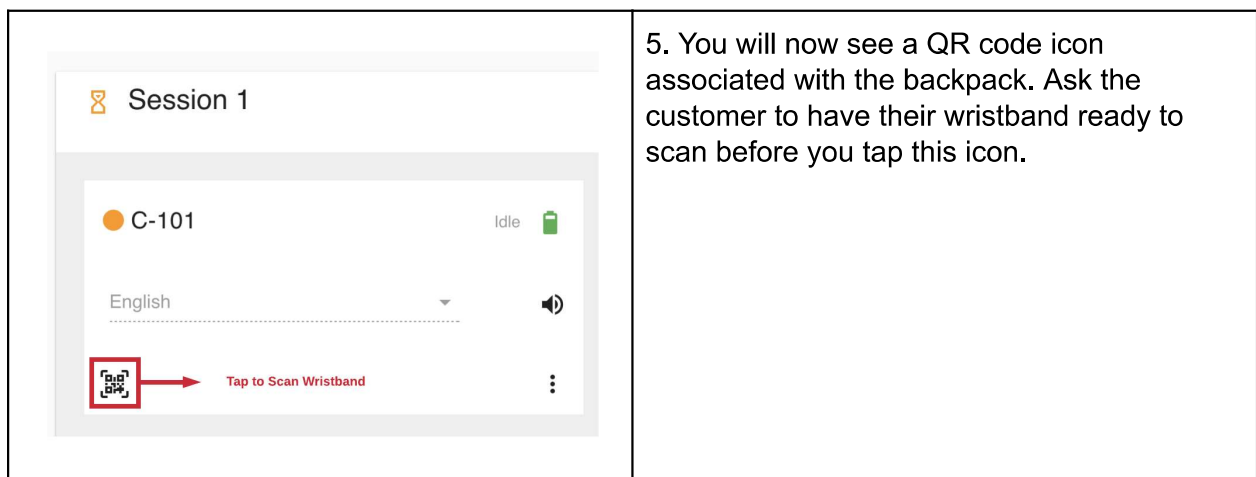

Follow this tutorial to scan wristbands for each backpack.

1. Start a session by tapping  from the main screen as you did at the start of the day.

	2. Start adding the backpacks you've selected to your session. NOTE: If you do not see any backpacks available here, try tapping the  Devices pane, allow it refresh, and return to adding backpacks. 3. Tap 
---	---

4. The backpacks you've selected will now appear on this screen. We'll use C-101 as an example for the rest of this tutorial.

5. You will now see a QR code icon associated with the backpack. Ask the customer to have their wristband ready to scan before you tap this icon.

	6. Use the camera on your iPad to scan the QR code on the wristband. Once the QR code has been scanned, the screen will automatically exit.
	7. Now your customer's name will appear with their backpack. Repeat this process for all customers in the session. 8. Tap . This will load the session, but not start the actual experience. You'll do that once your group is suited up and next in line.

Suiting Up Customers

Make sure the headsets are clipped to the shoulder straps by the carabiners, then direct customers to the backpacks with numbers that match the session you started in OpRemote. Make sure all customers in the group have completed each step in the sequence before moving on to the next step. Allow customers to complete the steps on their own, and only assist if necessary. Follow the steps in this order. It should take approximately two minutes:

First, customers put on the shoulder straps. Remove the hook from the backpack loop once they've done this.

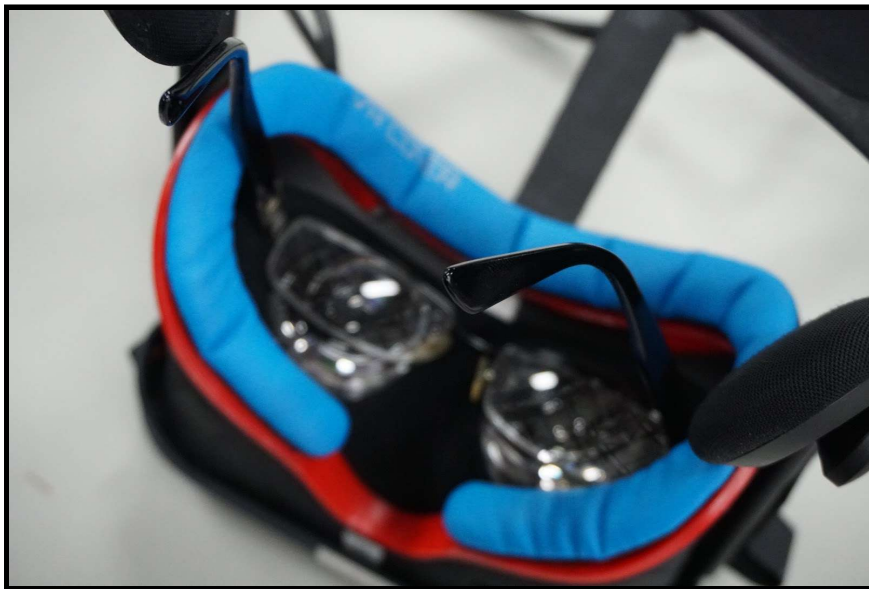

Next, customers clip in the waist and chest straps and can adjust the tightness themselves. Offer to assist if needed.

Finally, you will unclip the headsets from their carabiners and hand them to the customers. Tell them “You can put the headsets on yourselves. There are two straps on the sides and one on top to adjust the fit. Let me know if you need help.”

To ensure the best experience, make sure customers’ vision through the headset is the best it can be. If they can’t see well, an adjustment slider on the underside of the headset can be used. Sometimes twisting the front of the headset up and down can clear up the view for a customer.

Customers with Glasses

If a customer is wearing glasses, first ask them if they can try the experience without them. If not, it’s best to ask them to take the glasses off to see if they’ll fit into the headset itself, then put the glasses and headset on as one unit. Sometimes glasses frames are too large for this, and you can suggest that they try it without glasses. If the

customer is not satisfied, they can be directed to the lobby. Suggest that they can receive a free play and return with smaller glasses or contacts, or they can be given a refund.

Approaching the Pre-Game, Plus a Rules Reminder

Once customers are properly suited up, tell them to keep their headsets on their foreheads so they can see as you walk to the pre-game section.

As you approach the pre-game and wait for your turn to go in, get their attention and briefly review some key rules in the playspace. Say,

“We’re about to begin. While you’re in the playspace there is no running, jumping, or throwing. Keep your headsets on and raise your hand if something is wrong. Someone will always be there with you to assist. Any questions?”

Starting the Experience

Inside the pre-game area is a timer. If it is a busy time of day, you’ll use this to properly space out groups inside the experience so they stay a safe distance from each other. The timer should read **4:00** at the least before you’re allowed to start the next session in OpRemote. If it is a less busy day, you can wait 4:30 or 5:00 to make sure there are no collisions.

Once you’ve checked this timer, tell customers to stand in the corners of the pre-game area, with two on each side. This allows them to see the images in their headset view more clearly. Make sure to remember your group number on OpRemote, as there may be multiple groups running simultaneously.

Tap “Start Game” at this point and restart the timer. If the Leap Motion device on the headset is functional, customers will be able to start themselves once they give a thumbs-up.

Prepping Strikers for the Experience

Once customers have begun the pre-game, step into the gear area inside the playspace, turn on the Strikers with numbers matched to the group's backpacks, and place Strikers in the designated areas inside the caboose.

Forging a Clear Path as a Guide

By now the group should be coming into the caboose. At the start, stay close enough to them to assist quickly if needed, but not so close that you'd make physical contact with them if there are any sudden movements.

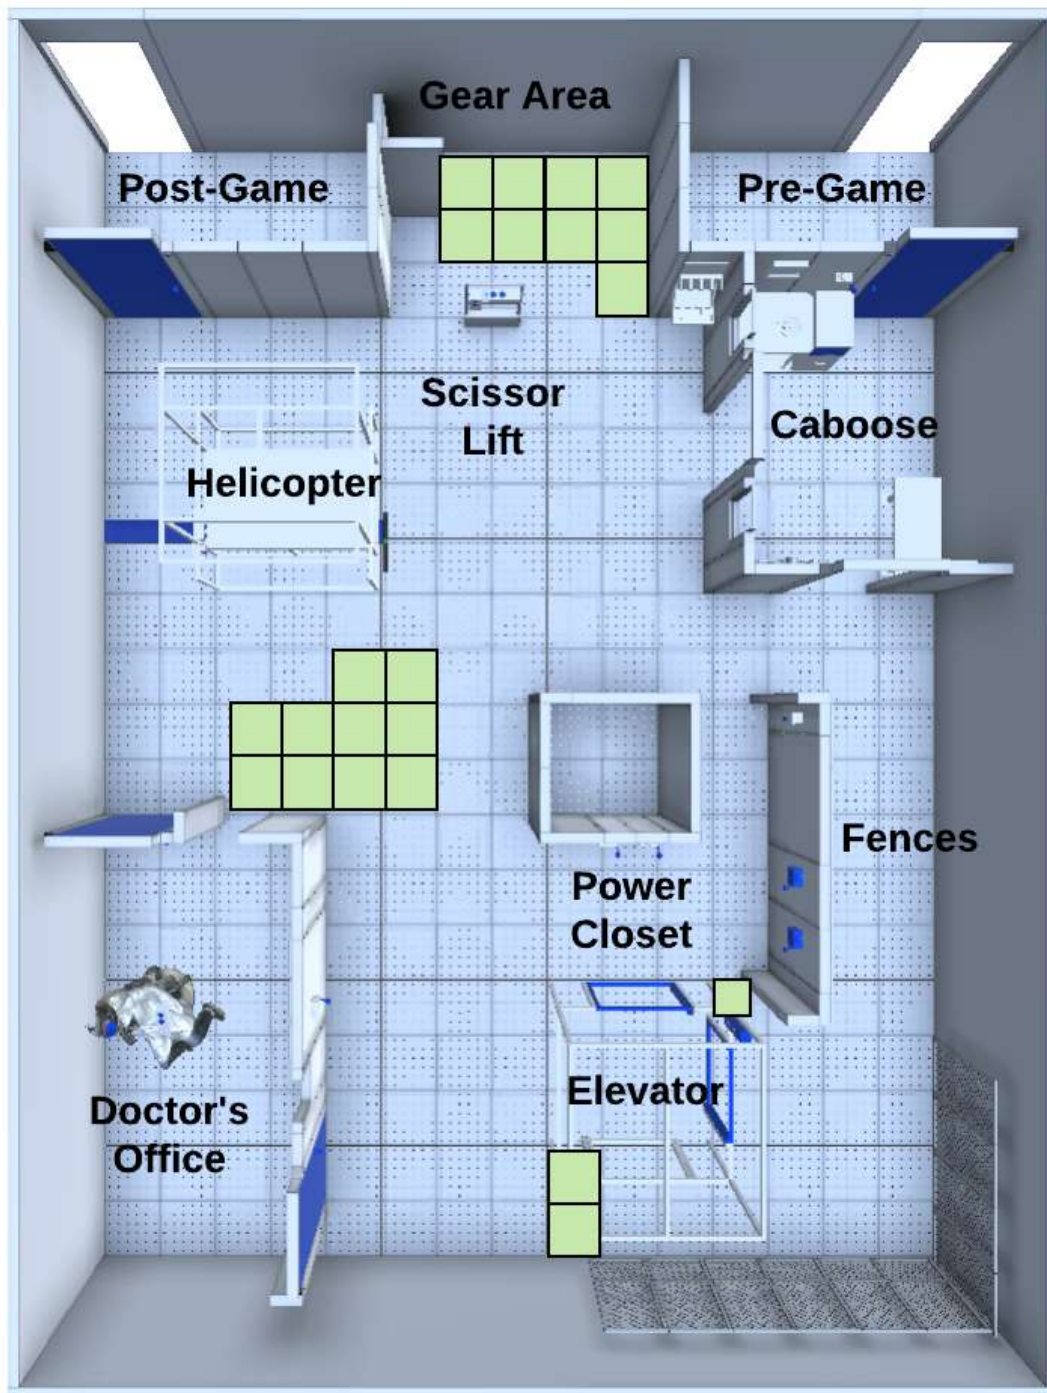

Based on their behavior you want to know if:

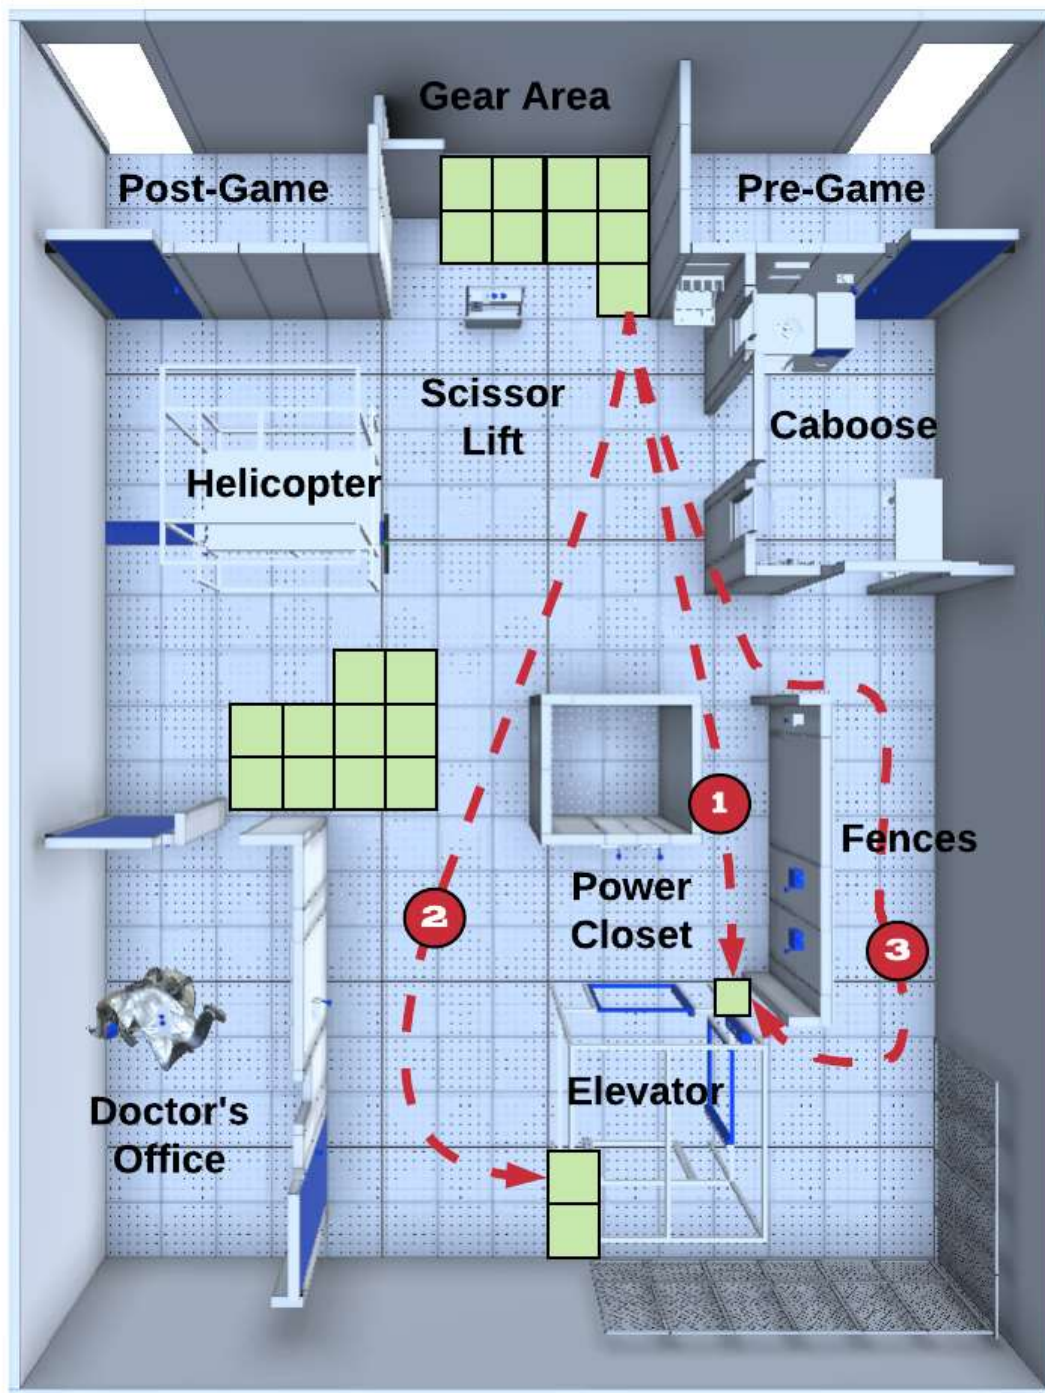

1. They're physically and mentally comfortable within the experience.
2. Their Strikers are functioning properly.
3. The game performance is optimal and not causing them trouble.

After verifying this, you should stand and be ready at designated safe zones throughout the playspace, moving from one to the other with caution as your group progresses.

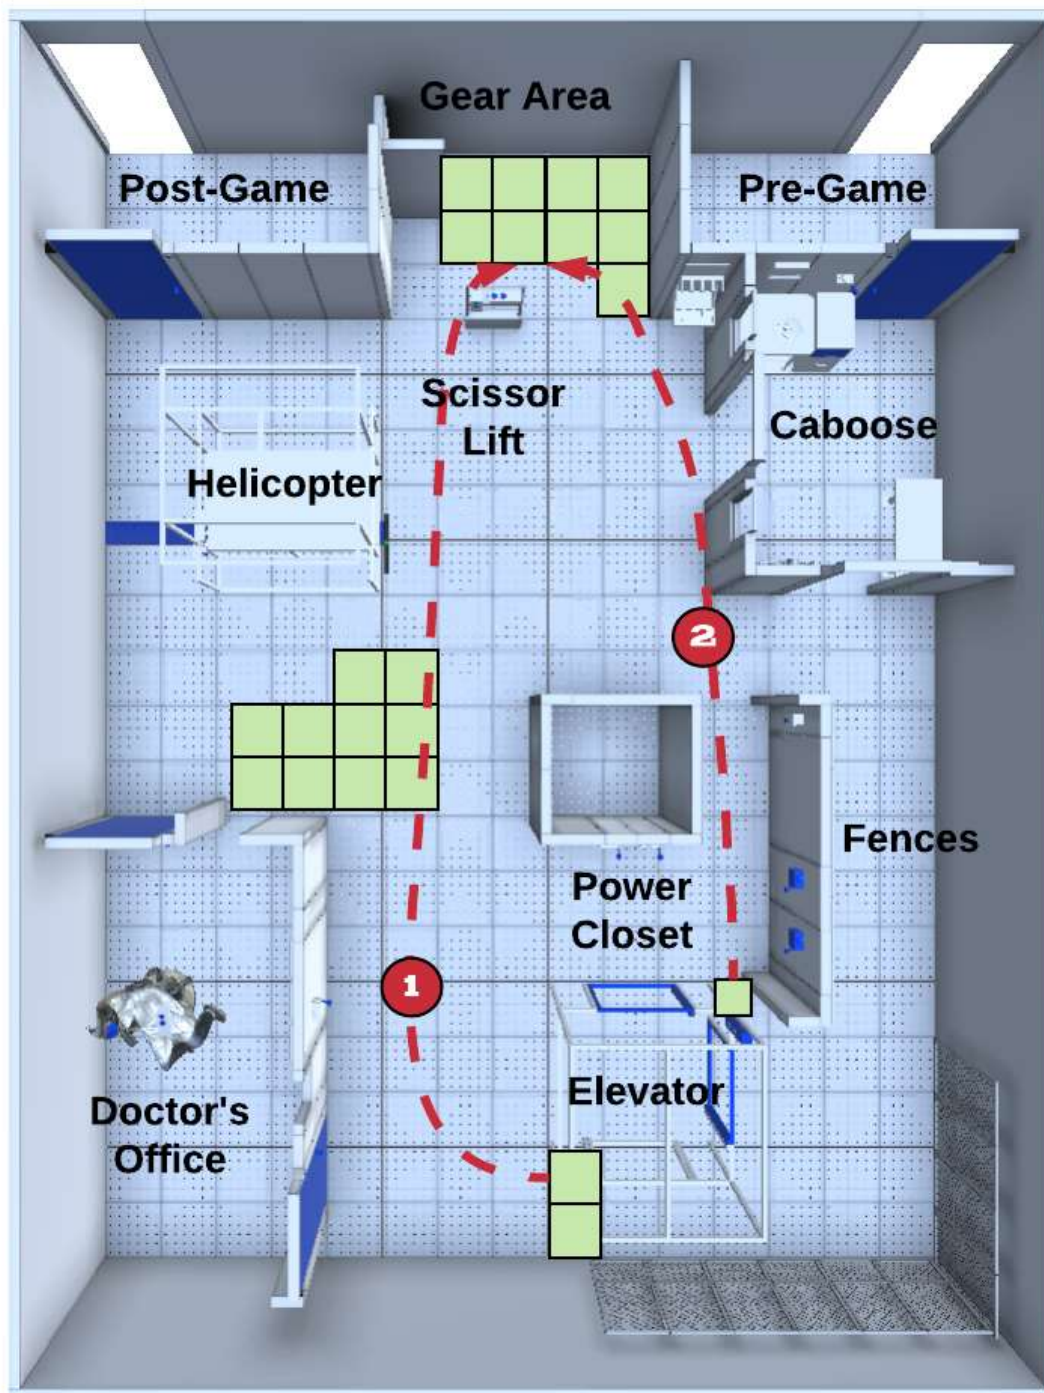

The playspace can hold up to six groups of four at maximum capacity. Follow this suggested path to limit the chance of making physical contact with customers.

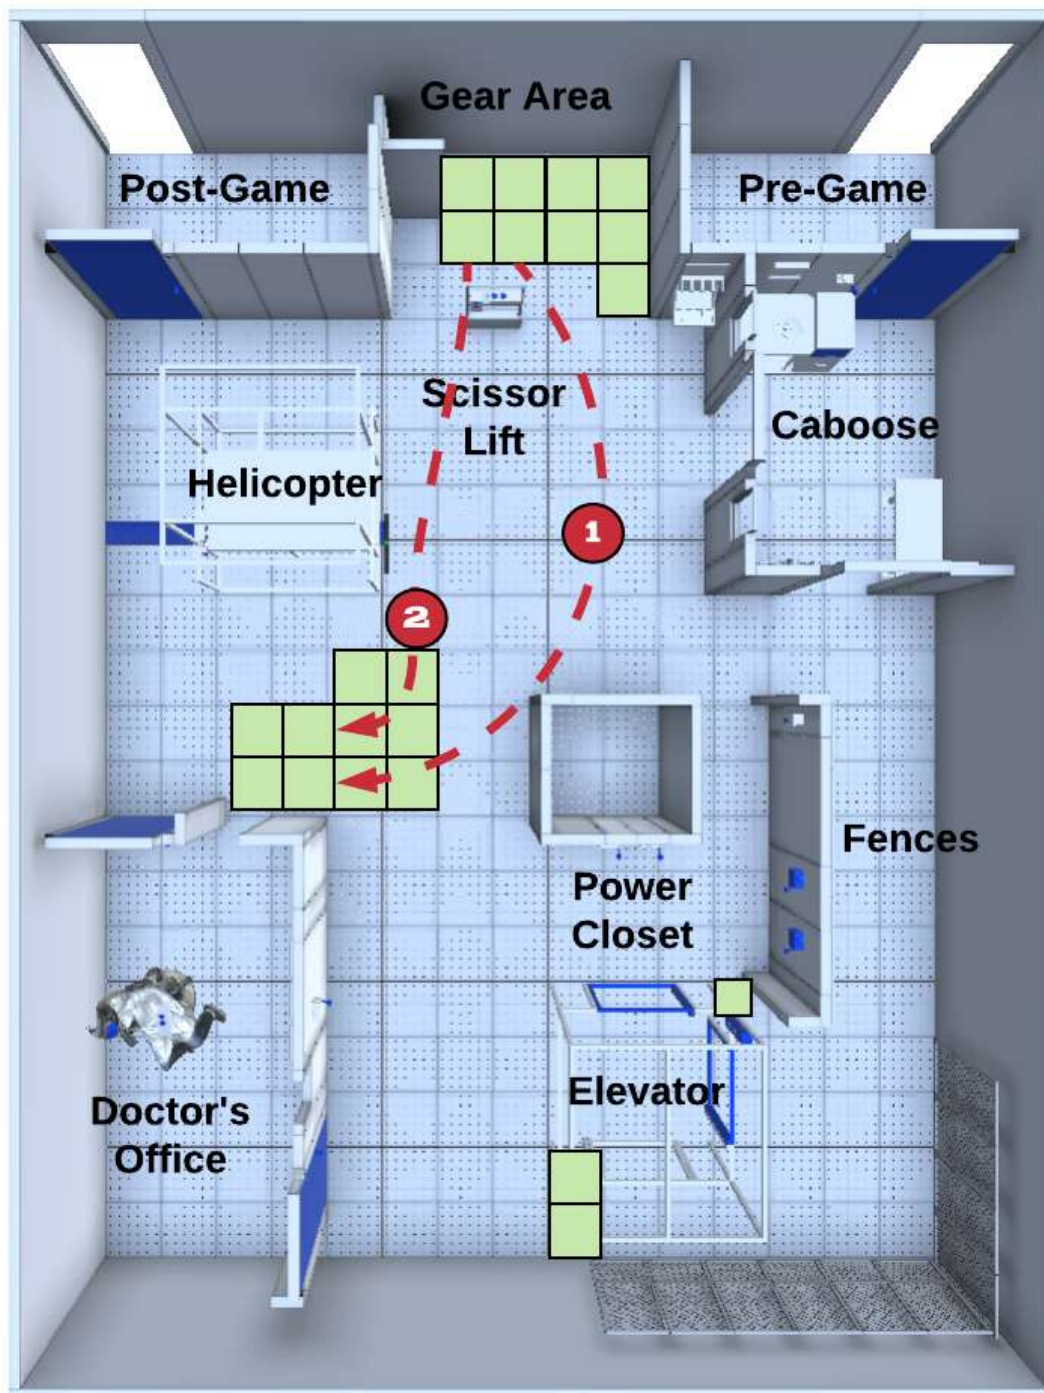

The areas marked in green are considered your safe zones. If you were a frog, these would be your lilypads. Stay in these zones whenever you're not moving within the playspace.

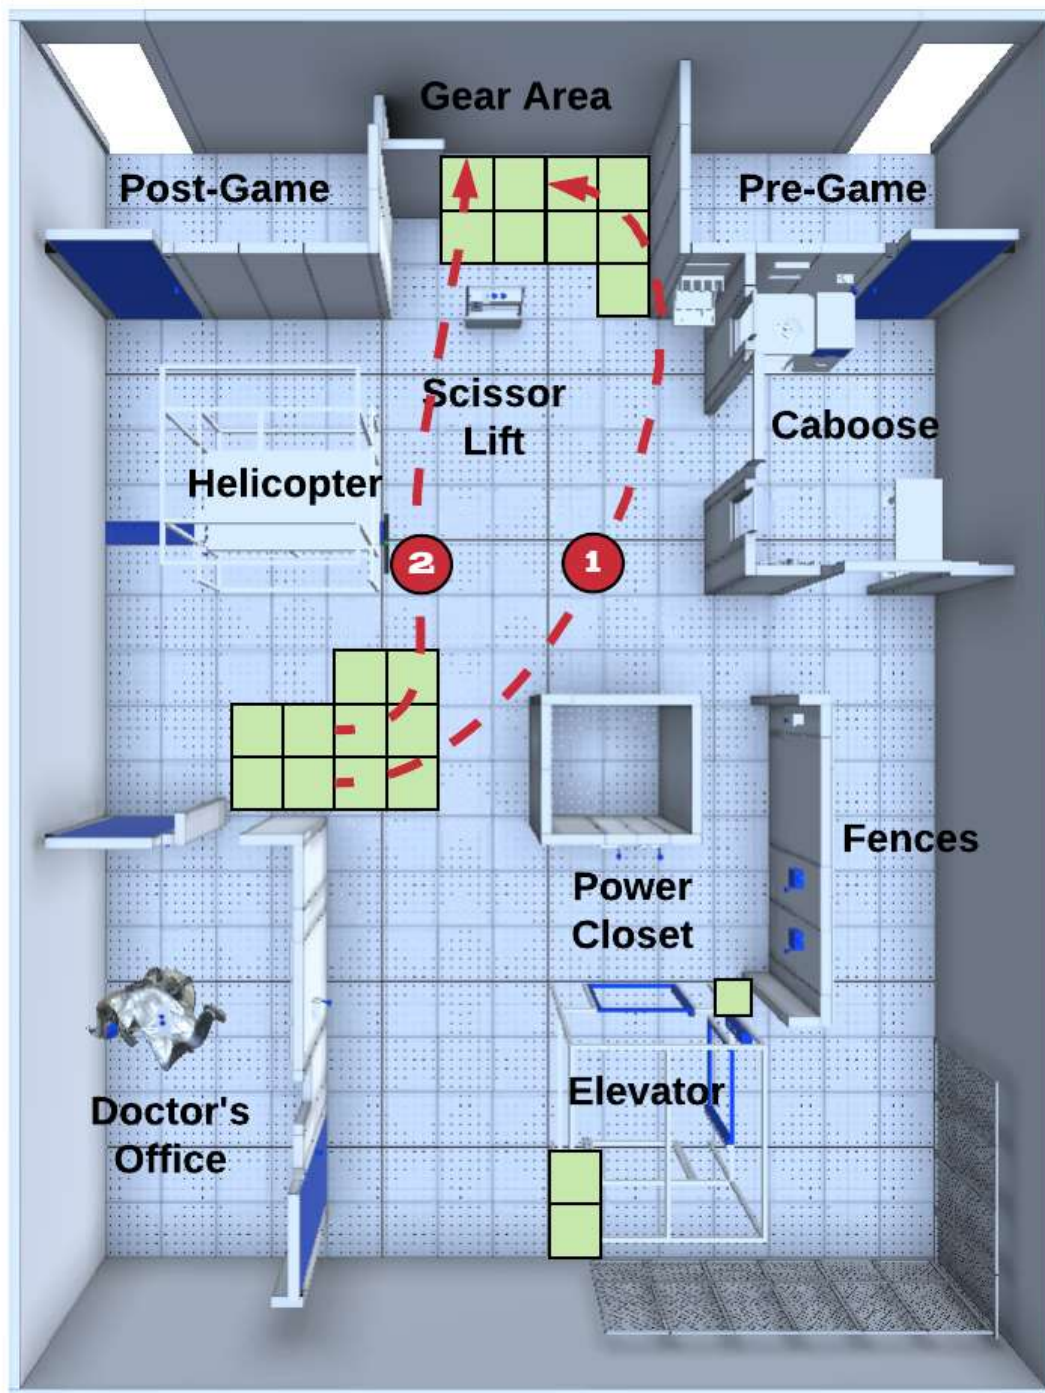

Stay in the gear area and set up Strikers for your group. Once they leave the caboose, you have three paths to the elevator. Number 1 should be your first choice, but choose 2 or 3 if there are other groups blocking you.

Meet the group next at the scissor lift. If you need to take route 2, do so by following behind them. **Important:** Remove, turn off, and stow any Strikers from the post-game rack while in the gear area.

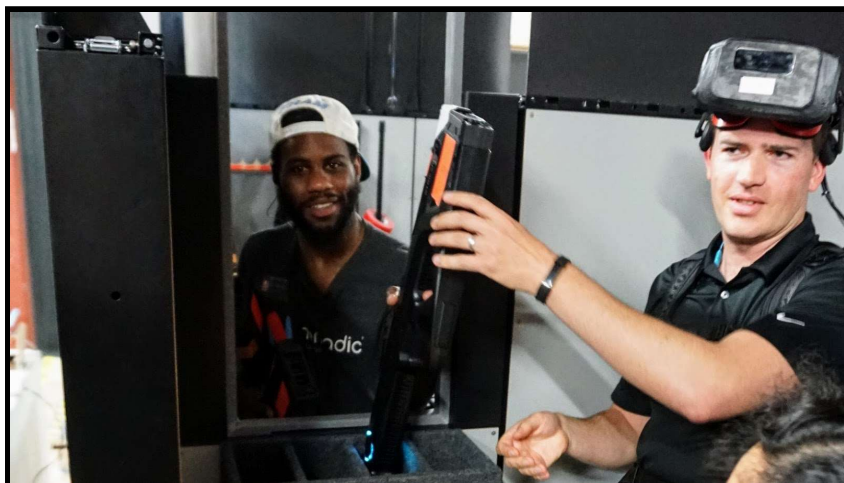

You'll be in this larger safe zone from when the group fights off the horde outside the Doctor's office, until when they ride the helicopter.

Take route 1 if there is another group on the scissor lift, and route 2 if there is a group on the caboose. Meet your group in the window near the Striker rack in the post-game.

Post-Game Procedure

In the post-game area, watch as customers deposit the cure for the zombie outbreak. The post-game voiceover will tell customers to rack their guns and lift their headsets. Say “Welcome back. Looks like you all had a great time getting those zombies.” Then take their Strikers to deposit them in the rack outside the post-game.

Tell them to keep their equipment on and follow you out to the gear room. Assist them to clip their headsets back into the carabiner on the backpack strap, then ask them to back into the hooks. Put the hook in the top loop of the backpack, raise the hook slightly with the tensioner and tell them to step out. Thank them all for coming, and remind them to stop by the lockers, look at their scores on the leaderboard, and head to the lobby for a photo op.

END SESSION

Make sure to tap on OpRemote once the group is finished.

Note: taking photos in both the Nomadic experience and in the gear room is not allowed. When exiting the experience, don’t encourage photos, but don’t forbid a customer who wants to take a selfie or two.

Prepping Backpacks for the Next Group

Now that the experience has completed, you will get the backpacks and headsets ready for the next group. Follow these instructions:

1. Plug the overhead charging cable into the backpack.
2. Swap all batteries in the backpacks, regardless of their charge level. Use the cart in the gear room to store and move the batteries to and from the charging station.
Note: do not swap batteries until the backpack is plugged in.
3. Use a lens cleaning wipe to clean the headset. Start with the lens itself, then move to the head straps, face cushion, earphones, and Leap Motion lens.
4. Loosen all backpack straps to make suiting on easier for the next group.

Radio Communication

You'll be equipped with a radio to communicate with other guides. This is mainly used to dictate pacing in the playspace when there are multiple groups. If a guide has a group that is making slow progress, they can alert the guide behind them that they may have to delay their own group to prevent collisions.

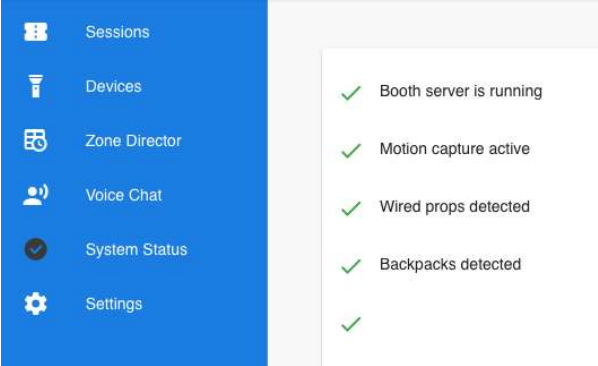

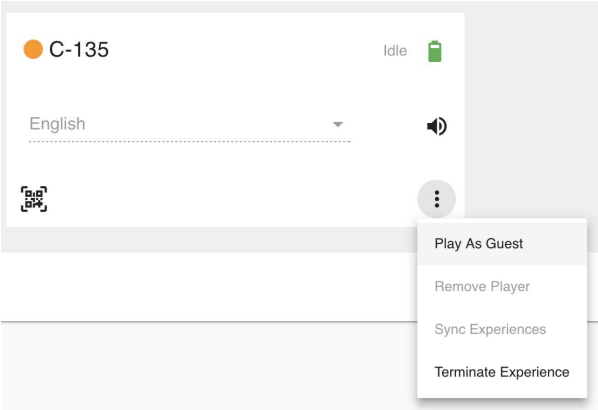

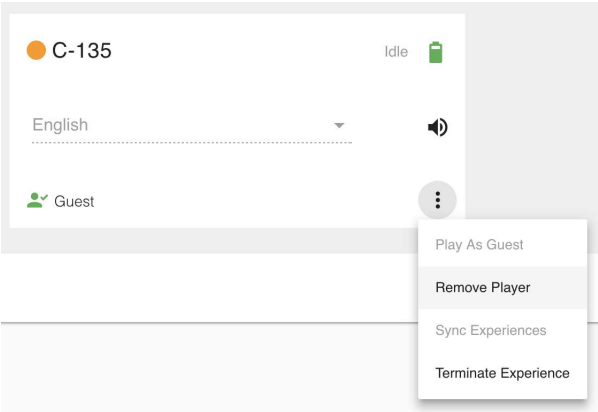

If your group is getting too close to another group, speak in a clear voice close to their ears and say "please wait here until I tell you it's ok to go." Customers are often so immersed in the experience that hearing an outside command will put them straight to

attention. When the coast is clear, tell them "now you can proceed."

Convenient Features of OpRemote

While your group is in the playspace, you may have to make changes to their experience from OpRemote. Here are the features available to you, and instances in which you should use them.

A screenshot of the OpRemote interface. It shows a list of customers: C-101, C-102, and C-105. C-101 and C-102 are connected, while C-105 is connecting. A volume slider is visible for C-102, with a blue dot indicating the current volume level. The language is set to English.	1. You can control a customer's volume by tapping on the speaker icon in their backpack window. A slider will appear and you can adjust their volume. Only use this if a customer has asked you to, or they've expressed difficulty with their volume level.
A screenshot of the OpRemote interface, similar to the one above, but with a menu open for customer C-102. The menu contains two options: "Terminate Experience" and "Sync Experiences".	2. There are a variety of reasons to end an individual's session, which are covered later in this guide. If you must do this, tap the icon shown and then tap "Terminate Experience." Note that this can only be used once the experience has already started.

END SESSION AND 	3. Tapping “End Session” will end the session for all members of the group you’re guiding. 4. Tapping “End All Sessions” ends sessions for every single customer in the playspace. This should only be used in emergencies.
	5. The System Status pane gives a continual update on the health of the playspace and the technology that runs it. If the experience doesn’t seem to be working properly, you can have a quick look here. If you don’t see green check marks for every item, alert your Manager or Field Service Technician.
	6. There are a variety of reasons you may want to launch a backpack without using a QR code. Select “Play as Guest” to do so. This can be used for internal testing of the game, VIP visits, or other instances authorized by your Manager.
	7. If you have launched the experience already, but need to swap a customer’s backpack, select “Remove Player” to take that backpack out of the session before you add a new one.

Unexpected Behaviors in the Experience

While we want all of our customers to have a positive experience at Nomadic, what they do in the playspace is not always predictable. This can be part of the fun, but here are some pointers for what to do in specific cases.

Collisions

You'll most often see customers' equipment colliding with each other. This includes backpacks, Strikers, and headsets. These are to be expected and allowed as long as they're not intentional or forceful. Customers who are particularly rowdy and a danger to others can be given a warning. Simply saying "don't bump into your teammates" spoken into their ear, will often remedy this. If the behavior is persistent, give them warnings. After the second warning, tell them they will be asked to leave if they do it again. If it does happen a third time, tell them to lift their headset, and then escort them from the playspace. Contact the front desk with your radio to tell them a customer has been ejected.

If there is a collision that is intentional and violent, eject the customer immediately.

Removing the Headset

Sometimes you'll have a customer who wants to take a peek at the physical playspace by lifting their headset. Strongly tell them to lower their headset. This is another "three strikes" situation as noted above.

Taking Photo or Video

This infraction warrants an immediate ejection from the playspace.

Wandering and Exploring

The view that the customers sees in the headsets will allow them to stay on a set path, but you may find customers trying to break through those boundaries, especially if they're returning customers and decide to explore. Redirect them to their group as soon as they wander, and use the "three strikes rule" if necessary.

You'll often find that a customer who wanders or explores is a repeat customer. They're familiar with the experience already, and want to test its boundaries. Ask customers beforehand if they've tried the experience before. Sometimes they'll explore, but sometimes they may become the leader of their group. "The Repeater Becomes the Leader."

Fear and Confusion

A customer that is acting erratically, or seemingly frozen, may be having trouble with the intensity of the game. Allow them to work it out for themselves as much as possible, unless they're in genuine distress or their behavior is impeding progress of the group as a whole.

Nausea

Be attentive to customers who experience nausea. This can be due to a tendency towards motion sickness, a tracking issue in the experience, or lag from the computer. If a customer vocalizes a sense of nausea, or appears to have symptoms of nausea, verify it with them, then end their experience if needed. Have other guides in the playspace check with their groups as well. Alert your Manager or Field Service Technician, and have a group of employees test the experience to verify the cause of the nausea.

Fear of Heights

The plank can be frightening to traverse. Suggest that they step to the sides of the plank to test that there is, in fact, floor across the entire playspace. If this doesn't work, you can suggest that they raise their headset slightly to see the physical plank as they walk across it. If this doesn't work, allow them to remove the headset completely to cross the plank.

Troubleshooting Within the Experience

 What do I do if there is a problem?	While we'd like the Nomadic experience to perform flawlessly, we sometimes run into technical snags that must be solved. Your role as an operator should be to address these issues as quickly as possible while maintaining customer satisfaction.
	

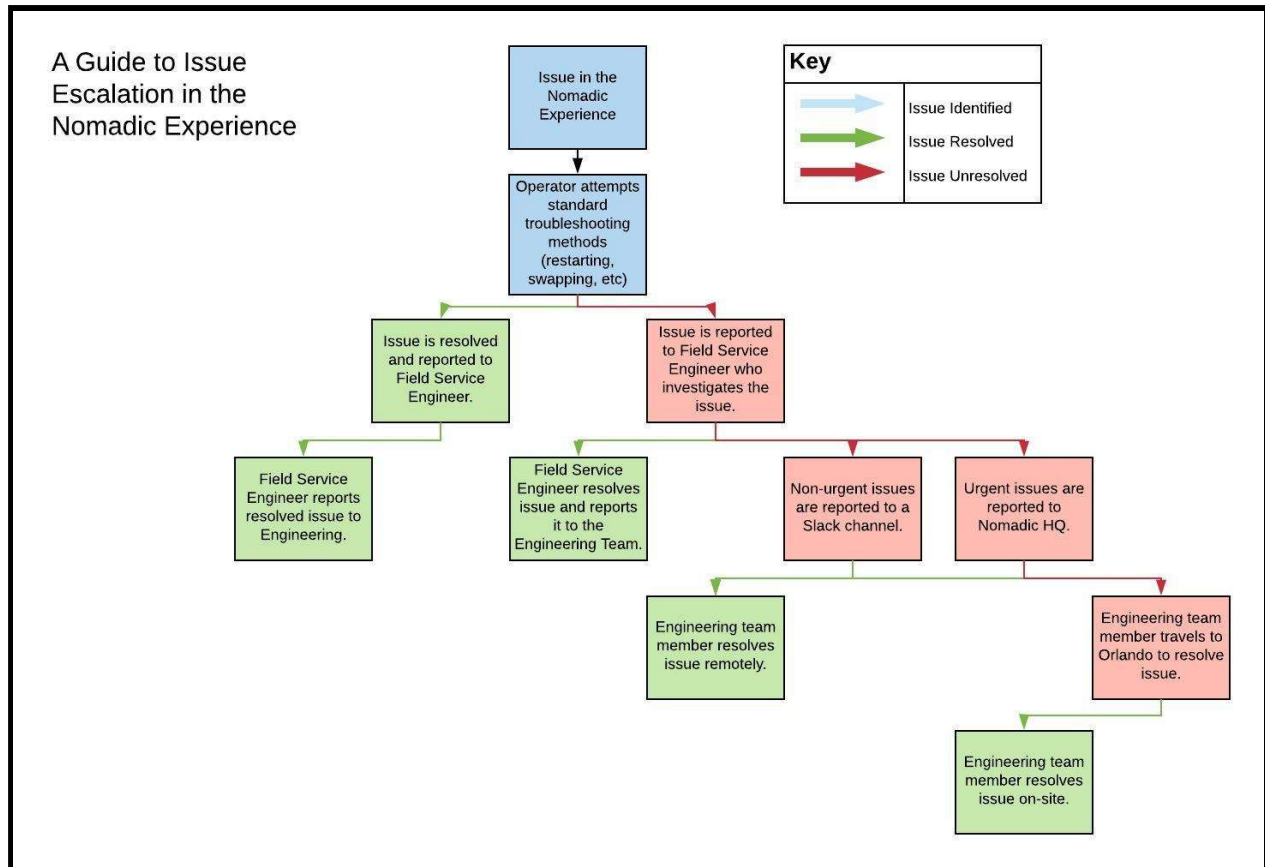

As a general rule, your first lines of defense for any technical problems should be these three processes:

1. Swapping a backpack that doesn't work correctly.
2. Power cycling a Striker that doesn't work correctly.
3. Restarting the session in OpRemote.

Make sure to report all technical incidents to your Manager or Field Service Technician. If necessary, they will be escalated to Nomadic Technical Support.

Guide to Issue Escalation

Use this process whenever there is a technical problem at Nomadic.

Below are a few examples of common technical issues you may encounter, and the immediate actions you can take.

The Striker is Frozen or Won't Shoot

Sometimes a customer will mention this during the experience, but perhaps not at you directly. Ask them what's wrong to confirm what's happened. Tell them to keep playing while you fix it.

At this point, you'll have to power cycle the Striker. Here's the process for that:

1. Tap the button on the bottom of the Striker three times, and hold it for the third time until the light turns off.
2. Wait three seconds, then hold the same button down until the Striker turns on. Release the button and wait for the light to turn green, and then blue. Ask the customer to try again.

You may have to repeat this process a few times before succeeding. If the Striker is completely unresponsive, put a fresh battery in and restart it using the above method.

The Headset Display is Frozen or Displaying Something Unexpected

If the customer is not seeing the Arizona Sunshine experience in VR, something has gone wrong. It could be frozen, the headset has failed, or any number of other problems. If this happens, escort the customer out of the playspace and direct them to the front desk for a free play or refund.

If this happens before the experience begins, have the customer take their backpack off, set the backpack aside, and give the customer another backpack. Use the “Remove Player” function in OpRemote to change the configuration.

Make sure to let your Manager or Field Service Technician know over the radio which backpack isn’t functioning, and it will be taken care of.

When a Backpack Crashes Within the Experience

Whenever a backpack or headset crashes in the playspace, tell all group members to raise their headsets and follow you out of the playspace. Restart the experience immediately, even if it impacts already scheduled groups.

Emergencies and Unexpected Issues

Sometimes there may be events that cause the booth shut down temporarily, or even cause us to evacuate the building.

Technical Issues

In the event of an unexpected, system-wide technical issue, you may need to tell customers to leave the playspace. Politely apologize, and tell them you’ll do your best to get the experience back up and running as quickly as possible.

Check with your Manager or Field Service Technician for further instructions. If it’s just a brief delay, groups can leave their equipment on, and be restarted into the experience in the order in which they came out.

Common Wait Times

For other issues: there may be a longer wait. The most common remedies for technical problems are a network reset (10 minutes), or a full system restart (15 minutes). Relay the wait time to customers. If they don't wish to wait, direct them to the front desk to receive a free play.

Retail Procedures for Incomplete Experiences

As a general rule, customers who don't have a complete Nomadic experience that is free of technical issues should be offered a free play. Here are some examples of technical issues in the experience, and how you should respond as their guide.

1. If one or more Strikers in a group stop functioning, power cycle or swap batteries, and allow them to continue as long as this process takes less than 30 seconds. If the Striker still won't pair, give them a choice to either continue with their group without a Striker, or be escorted out of the playspace, after which they can try the experience again with their group or receive a free play.
2. If one customer's experience crashes (they'll see a frozen screen, black screen, or a lot of lag), escort the group from the playspace and restart them immediately. If they're not interested in trying again, offer them all a free play for another time.

Non-Technical Issues and Standard Operating Procedures

Below are four Standard Operating Procedures (SOPs) that you should follow when there's an unexpected event or emergency. We cannot anticipate all issues that can affect Nomadic, but use these as guides that dictate your behavior to ensure safe and happy customers.

Copies of these are available in the office.

Injury and Incident Reporting

SOP #: 004

Purpose:

The purpose of this SOP is to identify and outline the steps to take when there is an injury at our location.

Responsibility:

Following an injury, It is the responsibility of all Nomadic staff to follow internal procedures for documentation and legal purposes. While our playspace design and staff practices minimize risk to our customers, the behavior of the customers can sometimes result in injury.

All employees are expected to act and conduct themselves at all times in the best interest of Nomadic. When an injury occurs, no matter how insignificant it may seem to be, it is of the utmost importance never to presume or admit guilt or fault of any kind. Employees should never speculate on the cause(s) of the accident or injury or discuss any facts of the accident. Employees should cooperate with the investigating authorities and with any investigation conducted by or on behalf of Nomadic. Any and all questions relating to an accident involving Nomadic property and/or personnel should be addressed only by a Nomadic Manager.

Procedure:

Follow this procedure whenever an injury occurs for either an employee or customer.

1. Assess the situation. Any time there is an injury, immediately notify the Manager over radio.
2. If it is a minor injury, remove the customer through the back door of the playspace, and offer first aid (cleanse, bandage, ice pack, etc) with the first aid kit located in the office. Do not administer first aid yourself, and make sure you're in an area where security cameras are located.
3. If it is a major injury, stop all sessions preceding the place of injury, and allow sessions that are ahead to complete. Do not offer to help or assist them in moving. This could aggravate the injury.
4. Ask the customer if they'd like you to contact emergency services. If the customer is unable to respond, call 911.
5. If they do not want emergency services but would like to see a doctor, offer to call a taxi or an Uber for them.
6. File an incident report. Copies are located in the office. Write down as many details as possible and document with pictures. Please be professional as these forms can be used as evidence in court. Names and addresses of witnesses as well as their statements are extremely important and should be included whenever possible.
7. Report the incident to Nomadic HQ within 24 hours of the incident.
8. Follow up with the customer by phone within 24 hours of the incident.

9. Following the incident, management will retrain staff to minimize the chance of a similar accident happening in the future. This training must be documented and signed off by all employees using the Incident Retraining Form.
10. If Nomadic equipment is involved in the incident, it must be stored onsite for a minimum of four years without being tampered with, and reported to the manufacturer. This is required by Florida state statute of limitations.

Cleaning of Biohazard Materials

SOP #: 002

Purpose:

The purpose of this SOP is to identify and outline the steps to ensure any biohazard materials are disinfected, removed, and disposed of properly while maintaining the protection of our employees and our equipment.

Responsibility:

It is the responsibility of all Nomadic staff to follow the biohazard cleaning procedure using the kits provided to ensure the safety of our employees and customers. The Store Manager or Assistant Store Manager may ask you to either address a biohazard clean up or assist with the process.

Procedure:

When any biohazard material is present, including vomit, feces, urine, or blood, follow these steps:

1. If biohazard material is present in the playspace, all sessions that precede the spill must be stopped. Sessions that won't be affected by the spill during play may proceed. Don't allow any other sessions until the spill is addressed.
2. Alert all staff of the biohazard over radio. Use the phrase "Code Brown" and the location of the spill.
3. All customers affected by this stoppage will be given a free play
4. For spills in all other areas of the retail space, put up yellow safety cones in the area of the spill, and continue operations as normal unless otherwise directed by your Manager
5. Retrieve the biohazard spill kit located in the office and put on the protective gear included in the kit (gloves, gown, haircap, facemask, shoe covers)
6. Spread the Absorb! Solidifier on the spill. It contains enough for cover three liters. If there is more, use both biohazard spill kits.
7. Follow directions for the Absorb! Solidifier and cover the spill completely
8. Once the spill has reached a semi-solid state, it can be picked up using the biohazard scooper
9. Instructions for floor tile spill:
 - a. Disinfect the floor tiles and remove them using the drill and P3 driver bit in the Nomadic toolkit located in the storage area.
 - b. Check area under the floor tiles and clean as needed, ensuring all electrical wires and sockets are free and clear of biohazard material. Do not disconnect any wires. If parts appear to be non-functioning, alert the Field Service Technician. Disinfect as needed once clean.
 - c. Replace floor tiles with backup tiles found in the storage area. Hand tighten all screws before finishing with the drill.

10. If a biohazard spill occurs on carpet, repeat the above process and vacuum area once material has been disposed of.
11. Throw away all biohazard material and protective gear in a trash bag, and bring it outside to the dumpster.
12. Clean and sanitize anything that may have come in contact with the material.
13. Once space is clean, normal operation can resume.

Workplace Emergency Response

SOP #: 003

Purpose:

The purpose of this SOP is to identify and outline the steps to take when an emergency situation arises. A workplace emergency is an unforeseen situation that threatens the employees, customers, or the public, disrupts or shuts down your operations, or causes physical or environmental damage. Emergencies may be natural or manmade and include the following:

- Floods
- Hurricanes
- Tornadoes
- Fires
- Toxic Gas Releases/Chemical Spills
- Radiological Accidents
- Explosions
- Civil Disturbances
- Workplace Violence
- Illness/Injury

Responsibility:

It is the responsibility of all Nomadic staff to follow the emergency response procedure to ensure the safety of all Nomadic employees and customers as well as the protection of all equipment and assets. If this is confirmed as a true emergency, call 911 immediately before following this procedure.

Procedure:

1. When an emergency situation arises, immediately end all sessions in the playspace and ask customers to lift their headset and follow you to safety.
2. All guides will assess their groups to ensure no injuries have occurred.
3. The Manager on duty will take the master schedule posted in the office to ensure all staff are accounted for.
4. The greeter will print the day's reservations and ensure all customers in the lobby are safe and no injuries have occurred.
5. Turn on all radios and be attentive for further communication.
6. Once everyone has been deemed safe, Nomadic staff will escort their customers to the emergency assembly area located at _____.
7. The Manager on duty will check the schedule and do a head count to ensure all staff are accounted for.
8. The Manager will then check the reservation print-out and ensure all customers are accounted for.
9. If anyone is not at the assembly area, the Manager will begin radio communications to locate the missing staff or customer(s), then relay their location(s) to Orlando First Responders. Do not re-enter the building once evacuated.
10. If anyone cannot be located, the Manager on duty should call Pointe Orlando Public Safety at 407-516-0108.

11. If further assistance is required, the Manager on duty should call 911.

Cleaning of Virtual Reality Headset

SOP #: 001

Purpose:

The purpose of this SOP is to identify and outline the proper steps to take when cleaning the VR headsets.

Responsibility:

It is the responsibility of all Nomadic staff to follow the cleaning procedure and ensure the safety of our customers by upholding the highest level of cleanliness and sanitation. To do so, everyone must abide by the following cleaning procedure.

Procedure:

Throughout daily operation

1. All headsets must be wiped clean with a lens cleaning wipe after every usage. Use the same wipe for all parts.
2. Wipe the lens of the headset in a circular motion.
3. Wipe the face pad of the headset.
4. Wipe the headphones and head straps.
5. Wipe the Leap Motions lens.
6. Once all parts are clean, hook to the backpack strap with the carabiner.

As part of closing

1. All headsets must be wiped with the Simple Green d Pro 5 Disinfectant which is in the labeled spray bottles located in the gear room.
2. DO NOT spray or wipe the lens of the headsets.
3. Spray onto a paper towel and then wipe down the face pad, headphones, and head straps.
4. Repeat with a new paper towel for each headset using the cart to carry your supplies, making the process more efficient.

Closing for the Day

Once all customers have completed their experiences, it's time to return the playspace, gear room, lobby, and bathrooms to their original state.

Refer to the Google Form titled "Closing Procedure" in addition to addressing the following items:

These are your tasks for the experience itself.

1. Clean the experience of all trash and debris.
2. Charge the plank battery.
3. Make sure all backpacks have full batteries and are plugged in.
4. Charge all Striker batteries.
5. Charge all radios.
6. Charge all tablets.
7. Sometimes the backpack cables can become twisted with continuous use. To remedy this, simply rotate the headset in the opposite direction of the twist until the cables are straight.

Tasks for the retail space.

1. Clean all trash and debris.
2. Straighten and restock retail merchandise.
3. Clean the bathroom, refer to the posted checklist.

End of Day Report

At the end of the day you will fill out an Google Form called "Closing Checklist", which will be relayed to your Manager.

Company Policies

Dress Code and Uniforms

When you are working at Nomadic, you are expected to adhere to the following dress code at all times:

- Nomadic T-shirt
- Nametag
- Clean blue jeans with no frays or rips
- Sneakers with solid or near-solid color. Types of sneakers that are not allowed: Bright yellow, pink, orange, red, anything neon, or light-up sneakers

Tattoo and Jewelry Policy

Nomadic permits employees to wear jewelry or to display tattoos at the workplace within the following guidelines. Factors that management will consider to determine whether jewelry or tattoos may pose a conflict with the employee's job or work environment include:

- Personal safety of self or others, or damage to company property.
- Productivity or performance expectations.
- Offensiveness to co-workers, customers, vendors or others in the workplace based on racial, sexual, religious, ethnic, or other characteristics or attributes of a sensitive or legally protected nature.
- Corporate or societal norms.
- Customer complaints.

If management determines an employee's jewelry or tattoos may present such a conflict, the employee will be encouraged to identify appropriate options, such as removal of excess or offensive jewelry, covering of tattoos, or other reasonable means to resolve the conflict.

An environment of mutual cooperation, respect, and fair and consistent treatment for all employees is the company's goal. Nonetheless, the company is legally responsible for ensuring that no employees are subject to harassment or a hostile work environment. As an initial step toward resolution of any complaint or offense under this policy, Managers will be responsible for explaining the policy and answering employee questions. If an agreeable solution cannot be reached at that stage, Nomadic will follow company procedures to resolve the issue.

Language and Style

At Nomadic we use specific language to describe and refer to our product. Please use these guidelines when you interact with customers and other employees.

- Customer rather than Player or Gamer
- Experience = A state of being. Headset on, immersion.
- Playspace = The physical location where the experience takes place.
- Playspace is always one word.
- "Location-based" both words lowercase unless at the start of a sentence.

- The area where one suits up or suits off is the “gear room.”

Words that we use to describe the Nomadic experience:

- Immersive
- Immerse
- Tactile
- Sensory
- Heart-pumping
- Exhilarating
- Unique
- Experience
- Adventure
- Playspace
- Attraction
- Feel
- Touch
- Invite
- Inviting
- Walkable
- Headset
- Thrill
- Thrilling
- Discover
- Uncanny
- Trust
- Lens

Word we do not use to describe Nomadic:

- Game
- Gamer
- Novel
- HMD
- Goggles
- Augmented
- Sensation

Physical Contact with Employees

Always avoid touching customers unless absolutely necessary and if you've asked permission. The only exception to this is if a customer is in imminent danger. If they're about to violently collide with a solid object or another customer, you may reach out to break the impact.

It can be tempting to touch customers during the suitup or suitoff process. Do not do this unless they're clearly having trouble with the process, and you ask if you can help. For example, if a customer can't get a proper fit for the headset, ask if you can help adjust it for them.

Internet Policy

Internet access to global electronic information resources on the World Wide Web is provided by Nomadic to assist employees in obtaining work-related data and technology. The following guidelines have been established to help ensure responsible and productive Internet usage. All Internet data that is composed, transmitted, or received via our computer communications systems is considered to be part of the official records of Nomadic and, as such, is subject to disclosure to law enforcement or other third parties. Consequently, employees should always ensure that the business information contained in Internet email messages and other transmissions is accurate, appropriate, ethical and lawful.

The equipment, services and technology provided to access the Internet remain at all times the property of Nomadic. As such, Nomadic reserves the right to monitor Internet traffic, and retrieve and read any data composed, sent, or received through our online connections and stored in our computer systems.

Data that is composed, transmitted, accessed, or received via the Internet must not contain content that could be considered discriminatory, offensive, obscene, threatening, harassing, intimidating, or disruptive to any employee or other person. Examples of unacceptable content may include, but are not limited to, sexual comments or images, racial slurs, gender-specific comments, or any other comments or images that could reasonably offend someone on the basis of race, age, sex, religious or

political beliefs, national origin, disability, sexual orientation or any other characteristic protected by law.

Abuse of the Internet access provided by Nomadic in violation of law or Nomadic policies will result in disciplinary action, up to and including termination of employment. Employees may also be held personally liable for any violations of this policy. The following behaviors are examples of previously stated or additional actions and activities that are prohibited and can result in disciplinary action:

- Sending or posting discriminatory, harassing or threatening messages or images
- Stealing, using or disclosing someone else's code or password without authorization
- Copying, pirating or downloading software and electronic files without permission
- Engaging in unauthorized transactions that may incur a cost to the organization or initiate unwanted Internet services and transmissions
- Sending or posting messages or material that could damage Nomadic's image or reputation
- Participating in the viewing or exchange of pornography or obscene materials
- Sending or posting messages that defame or slander other individuals
- Attempting to break into the computer system of another organization or person
- Refusing to cooperate with a security investigation
- Sending or posting chain letters, solicitations or advertisements not related to business purposes or activities
- Using the Internet for political causes or activities, religious activities or any sort of gambling
- Jeopardizing the security of the organization's electronic communications systems
- Sending or posting messages that disparage another organization's products or services
- Passing off personal views as representing those of the organization
- Sending anonymous email messages
- Engaging in any other illegal activities

Social Media Policy

At Nomadic, we understand that social media can be a fun and rewarding way to share your life and opinions with family, friends and co-workers around the world. However, use of social media also presents certain risks and carries with it certain responsibilities. To assist you in making responsible decisions about your use of social media, we have established these guidelines for appropriate use of social media. This policy applies to all employees who work for Nomadic.

In the rapidly expanding world of electronic communication, social media can mean many things. Social media includes all means of communicating or posting information or content of any sort on the Internet, including to your own or someone else's blog, journal or diary, personal web site, social networking or affinity website, web bulletin board or a chat room, whether or not associated or affiliated with Nomadic, as well as any other form of electronic communication.

The same principles and guidelines found Nomadic policies apply to your activities online. Ultimately, you are solely responsible for what you post online. Before creating online content, consider some of the risks and rewards that are involved. Keep in mind that any of your conduct that adversely affects your job performance, the performance of fellow associates or otherwise adversely affects members, customers, suppliers, and/or people who work on behalf of Nomadic's legitimate business interests may result in disciplinary action up to and including termination.

Know and follow the rules carefully, and ensure your postings are consistent with our policies. Inappropriate postings that may include discriminatory remarks, harassment and threats of violence or similar inappropriate or unlawful conduct will not be tolerated and may subject you to disciplinary action up to and including termination. In addition, photos of the gear room and interior of the playspace are strictly forbidden. Posting of such photos to social media will also result in disciplinary action up to and including termination.

Always be fair and courteous to fellow employees, customers, members, suppliers and people who work on behalf of Nomadic. Also, keep in mind that you are more likely to resolve work-related complaints by speaking directly with your co-workers or by utilizing internal procedure and dialogue rather than by posting complaints to a social media outlet.

Nevertheless, if you decide to post complaints or criticism, avoid using statements, photographs, video or audio that reasonably could be viewed as malicious, obscene, threatening or intimidating, that disparage customers, members, associates or suppliers, or that might constitute harassment or bullying. Examples of such conduct might include offensive posts meant to intentionally harm someone's reputation or posts that could contribute to a hostile work environment on the basis of race, sex, disability, religion or any other status protected by law or Nomadic policy.

Make sure you are always honest and accurate when posting information or news, and if you make a mistake, correct it quickly. Be open about any previous posts you have altered. Remember that the Internet archives almost everything; therefore, even deleted postings can be searched. Never post rumors, speculation, or information that you know to be false about Nomadic, fellow associates, members, customers, suppliers, people working on behalf of Nomadic or competitors.

Maintain the confidentiality of Nomadic trade secrets and private or confidential information. Trade secrets may include information regarding the development of systems, processes, products, know-how and technology. Do not post internal reports, policies, procedures or other internal business-related confidential communications. Respect financial disclosure laws. Do not create a link from your blog, website or other social networking site to the Nomadic website without identifying yourself as a Nomadic employee. Express only your personal opinions. Never represent yourself as a spokesperson for Nomadic. If Nomadic is a subject of the content you are creating, be clear and open about the fact that you are an employee and make it clear that your views do not represent those of Nomadic, fellow employees, members, customers, suppliers or people working on behalf of Nomadic. If you do publish a blog or post online related to the work you do or subjects associated with Nomadic, make it clear that you are not speaking on behalf of Nomadic. It is best to include a disclaimer such as “The postings on this site are my own and do not necessarily reflect the views of Nomadic.”

Refrain from using social media while on work time or on equipment we provide, unless it is work-related as authorized by your supervisor. Do not use Nomadic email addresses to register on social networks, blogs, or other online tools utilized for personal use.

Media Policy

As a high-profile organization, Nomadic is frequently mentioned in and visited by the news media, which can include representatives from TV, radio, newspapers, magazines, blogs, and business publications, among others. Because news, both good and bad, travels quickly in our digital world, we want to ensure that information shared with media is honest, accurate, and aligns with our mission.

Even if well-intentioned, comments – even those supposedly “off the record” – can sometimes be misconstrued and distributed in ways that could be harmful to the reputation of Nomadic or its employees and stakeholders. Therefore, designated media

spokespersons have been identified to comment on behalf of Nomadic. Speaking to customers or conducting outreach activities as part of your normal duties does not designate you as a media spokesperson. If you have not been identified by your Manager as such, you are not an official media spokesperson of Nomadic. These official spokespersons are the only ones permitted to speak with and provide content to media outlets on behalf of Nomadic without prior authorization.

If a member of the media engages you in conversation beyond the scope of your normal Nomadic customer interactions, including questions about our positions or personal opinions, please politely ask them to wait while you contact your Manager. If this happens at an offsite Nomadic event or function, please politely explain that you are not authorized to comment on behalf of Nomadic, and suggest they call our retail location to reach the appropriate spokesperson.

If you are asked to provide content (verbal, written, or electronic) for any form of media, please consult your Manager before proceeding. This includes, but is not limited to, giving comments or interviews for a news story, writing articles for a publication or newsletter, and preparing testimonials for a Nomadic partner or client. It is advisable to check with your Manager for guidance before submitting any content to any entity that may be considered “media”. This policy applies to all employees who work for Nomadic.

Thanks from Nomadic

Thank you so much for assisting your customers with the most thrilling VR experience ever. We're so happy to have you here. Feel free to return to this guide as a point of reference. We know there are a lot of different parts to the Nomadic experience, and we hope you grow to learn and be proficient in all of them. Welcome to the team!
